ABOUT

At HULK 4X4, we equip off-roading enthusiasts and adventure-seekers who dare to forge their own paths.

Driven by a relentless commitment to innovation and quality, HULK 4X4's lineup is continuously evolving, bringing forward the latest in rugged, cutting-edge products that anticipate and fulfill the diverse needs of adventurers. Whether you're navigating the dense outback or scaling rocky terrains, our gear is engineered to enhance your outdoor experiences, combining durability with uncompromising performance.

With HULK 4X4, be bold, be adventurous, and above all, be unstoppable.

YOUR COMPLETE POWER SOLUTION

We understand that true adventure knows no bounds. That's why we've designed a comprehensive power solution that accompanies you to the world's ends, ensuring you're never left in the dark or without the creature comforts of home.

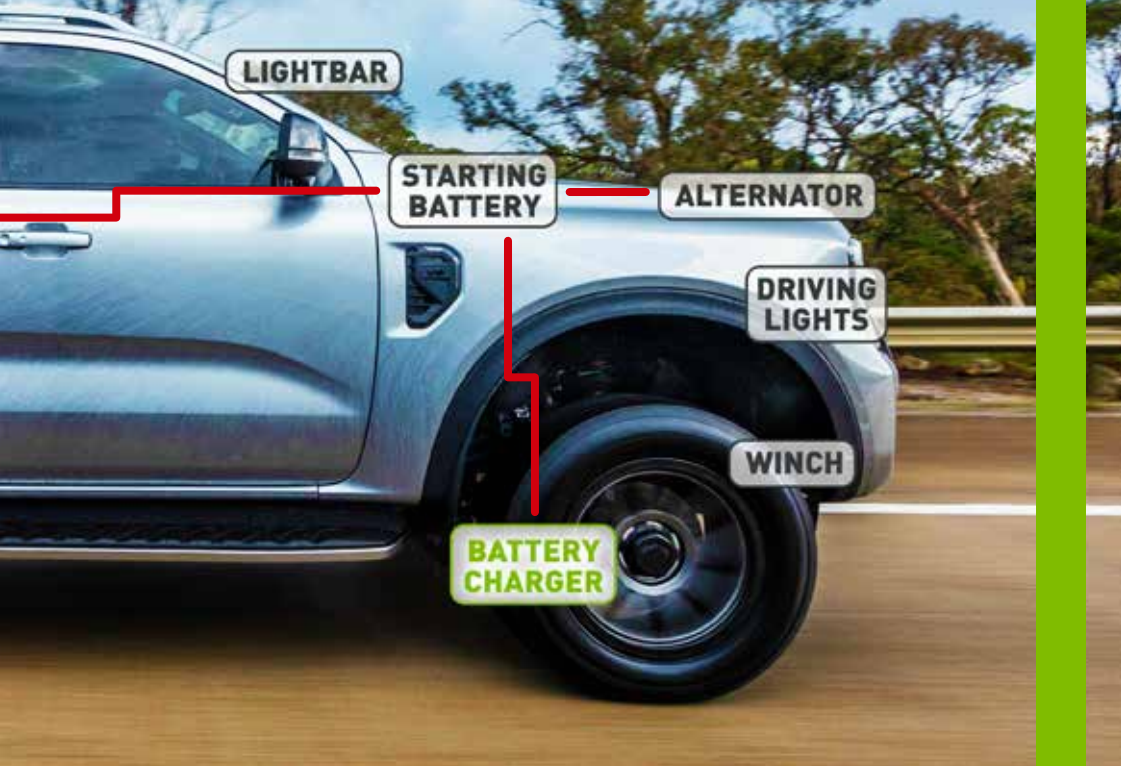

Here's how our range ensure you're powered up and ready for anything the next adventure throws your way:

Pure Sine Wave Inverters

Seamlessly convert 12V or 24V to 240V for household-grade power on the go, ideal for sensitive electronics in any travel scenario. For more information, please visit Page 08.

Lithium Batteries

Experience the future with lightweight, efficient, and safe Lithium Batteries. For more information, please visit Page 09.

Solar Panels

Efficient and durable, our Solar Panels ensure you're charged up anywhere under the sun, with both fixed and portable options. For more information, please visit Page 10.

Solar Charge Controllers

Maximize your off-grid solar setup with our PWM and MPPT Charge Controllers, optimising battery charging and longevity. For more information, please visit Page 10.

DC-DC Battery Chargers

Ensure your vehicle's auxiliary batteries are always at peak performance with HULK Professional Series DC-DC Battery Chargers. For more information, please visit Page 11

Battery Chargers

Completing our comprehensive power management system, our Smart Battery Chargers maintain battery health, providing sophisticated multi-stage charging for a variety of battery types. For more information, please visit Page 12.

BRING THE COMFORTS OF HOME TO THE GREAT OUTDOORS

Pure Sine Wave Inverters

Experience the great outdoors without sacrificing the comforts of home behind using HULK Professional Series Pure Sine Wave Inverters. Tailored for rugged 4x4 enthusiasts, our inverters range from 500W to 3000W, adeptly transforming 12V or 24V into a steady 240V current for all your sensitive electronics, in vehicles, RVs, caravans, and boats.

Engineered for compatibility with lithium batteries, these inverters incorporate advanced surge suppression to safeguard battery cells and the Battery Management System (BMS). Expect unwavering electrical protection and a practical USB port for seamless device charging.

Light up campsites, charge tools, or brew fresh coffee—these inverters are your reliable wilderness companion. They boast a user-friendly design with a rotatable LCD allowing real-time monitoring and configuration, including voltage, temperature, and protective measures.

Scan QR code for full range

Rotatable LCD Display

The inverters feature a rotatable LCD screen for easy installation, displaying real-time data like input/output voltage, voltage alerts, frequency, temperature, and system status for short circuits, overload, and backlight duration.

Powering air conditioners, microwaves, washing machines, TVs, fridges, coffee machines, power tools, and much more

UNLEASHING THE POWER

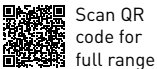

Lithium Batteries

Unleash the power of HULK Professional Series Lithium Batteries for relentless energy on rugged terrains. Choose from our 100Ah, 100Ah Slimline, or mighty 200Ah models for lightweight, long-lasting performance. These batteries outlast traditional ones by up to 60% and offer a significant weight advantage, ensuring your load is lighter and your journey longer. Engineered with an advanced Battery Management System for efficient charging and the power to connect multiple units, ensuring you stay powered in even the most severe conditions.

Embrace the freedom of the great outdoors with HULK 4X4 Lithium Batteries—the core of your off-grid adventures. Bolstered by comprehensive safety features and unparalleled reliability, they light up your path, energise your equipment, and ensure that your journey is as limitless as your spirit.

Dual Battery Trays

HULK 4X4 Dual Battery Trays enables easy installation of a secondary battery to power your critical gear without draining your main battery. Constructed with durable steel and a protective powder coating, these trays are designed to withstand extreme conditions and come complete with all essential mounting hardware for a seamless setup.

Voltage Sensitive Relay with LED Voltmeter HU6508

The HULK 4X4 Dual Battery Isolator expertly manages 12V systems for uninterrupted adventure. It smartly adjusts input voltage to connect or secure your equipment, ensuring optimal protection of your primary battery. Perfect for dual battery setups, this relay charges both batteries together and isolates them when the engine stops, keeping your starting battery always charged and adventure-ready. An LED Voltmeter also provides voltage status.

HARNESS THE POWER OF THE SUN

Solar Panels

- Fixed Monocrystalline Solar Panel (100W, 120W, 150W, 190W)
- Portable Monocrystalline Solar Panel (160W and 160W Complete Kit)
- Portable Folding Solar Panel (20W)

Scan QR code for full range

Power your adventures into the wild with HULK Professional Series Solar Panels, designed for unmatched reliability and supreme efficiency. These solar panels are the result of extensive research, incorporating cutting-edge technology and sturdy construction to conquer tough climates. With options for every explorer, our range includes both resilient fixed panels

and versatile portable options, all powered by high-efficiency monocrystalline cells for optimal performance. Whether you choose our Fixed Series for consistent power in a sleek package or opt for the mobility of our Portable Panels and Solar Blankets, you're equipped for enduring energy without compromise.

Solar Controller

Unlock the full potential of the sun with HULK Professional Series Solar Charge Controllers. Designed for the adventurer at heart, our solar charge controllers ensure you stay powered in the most rugged terrains.

Choose from robust PWM models in 30 Amp and 60 Amp or go for the advanced efficiency of our MPPT controllers available in 20 Amp and 40 Amp versions. Each model is built to last, featuring comprehensive electronic protection, compatibility with various battery types, and user-friendly interfaces for hassle-free operation.

Scan QR code for full range

The MPPT controllers bring technology to the forefront, optimising power extraction with their advanced tracking algorithm and offering smart features like programmable temperature compensation and real-time energy information.

KEEPING AUXILIARY BATTERIES CHARGED

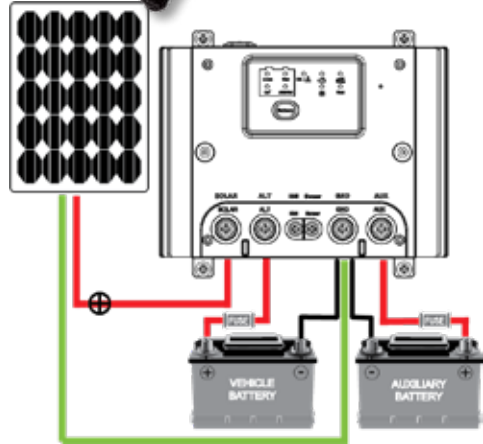

Scan QR code for full range & accessories

Under Bonnet & In-Vehicle DC-DC Battery Chargers

HULK Professional Series DC-DC Battery Chargers ensures your vehicle's auxiliary batteries are optimally charged whether you're driving or camping in the wild via solar. While standard vehicle alternators might not always deliver the charge your auxiliary batteries need, the HULK Professional Series DC-DC Battery Chargers stand ready to ensure that an inadequately charged battery never halts your journey.

Available in 15, 20, 25, or 40 Amp and 12/24V models, these chargers are equipped with a versatile, 7-stage automatic charging program that fits any battery type and size, ensuring a full charge and enhanced battery life.

Essential for the serious adventurer, they come with the versatility of multi-chemistry charging, the efficiency of solar MPPT regulation, and comprehensive electrical protection to keep you going strong in the wild.

Optional Remote LCD display allows for the main and auxiliary batteries to be monitored in real-time.

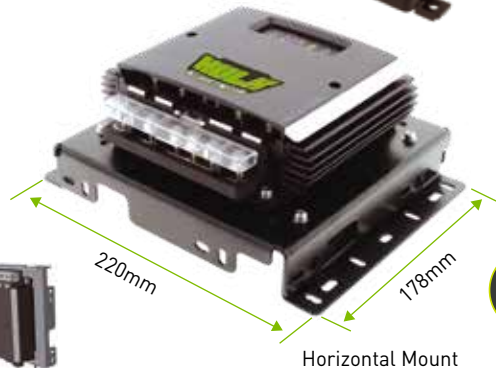

Terminal Blocks

The optional Terminal Block simplifies wiring with dedicated grounds for each input and output, and features a protective hinged cover, nickel-plated copper terminals, and M5 studs for secure, efficient connections.

Mounting Bracket

The optional Mounting Bracket, a heavy-duty, black metal accessory for HULK Professional Series DC-DC Battery Chargers, offers versatile horizontal or vertical mounting and easy installation thanks to its pre-holed design.

Battery Chargers

A dead battery can turn a thrilling adventure into a stranded nightmare. Ensure you're fully powered for every adventure with the HULK Professional Series Battery Chargers. Equipped with multi-stage, fully automatic, switch-mode technology, these chargers provide comprehensive care—diagnosis, recovery, charging, and maintenance—with precision for a broad spectrum of Lead Acid and Lithium batteries (selected models only) whether it's a Wet/Flooded, GEL, AGM, MF, Calcium, or EFB. The advanced MCU control accelerates the charging process, ensuring you spend less time charging and more time exploring.

Each charger is equipped with cutting-edge features such as spark-proof technology, overheating protection, and reverse polarity safeguards, ensuring safety and efficiency. The innovative XB2 Smart Processor not only restores batteries to their optimal state but also prevents overcharging, making these chargers essential for extended battery life and enduring expeditions.

PORTABLE EMERGENCY POWER SUPPLIES

Scan QR code for full range

Jump Starters

HULK Professional Series Jump Starters deliver unparalleled reliability, potent jump-starting capability, and the confidence to push the boundaries of exploration without fear of a dead battery halting your adventure.

Available in 800, 2000 and 2500 Amp models, each of these robust 12V units can effortlessly bring to life petrol and diesel engines across a diverse range of vehicles, ranging from motorcycles to cars, SUVs, boats, and even heavy-duty commercial machinery. Each model can also be used as a power source to keep your essential electronic devices energised.

ADVENTURE AWAITS

PS700 Portable Power Station

HU6504

Unleash your adventure with the HULK Professional Series PS700 Portable Power Station, the ultimate source of dependable power on-the-go.

Built tough for the wild, the PS700 features a robust 700W pure sine wave inverter for seamless energy to a range of devices, everything from smartphones to portable refrigerators, and includes versatile charging capabilities – from 240V AC outlets to USB ports and wireless charging. Fitted with a resilient LiFe-PO4 battery designed for 2,500+ charges and solar compatibility, it's your eco-friendly power source. All this in a compact and lightweight 9.7kg package ready to follow you from the depths of the forest to the peaks of the mountains.

OLED & Digital Gauges

Experience the durable reliability of HULK 4X4 Voltmeters, Ammeters, and Temperature Meters, engineered to enhance your outdoor ventures with precision:

Voltmeters: Monitor your vehicle's electrical health with pinpoint accuracy.

Ammeters: Ensure peak performance of your electrical system.

Temperature Meters: Stay informed and prevent overheating complications.

Customisable Integration

Optimise functionality without compromising style. Choose from our 29mm Round Gauges, Switch Size, or Rocker Size Gauges for perfect dashboard synergy. Our OLED Gauges provide crystal-clear, easy-to-read visuals with advanced display technology, offering exceptional contrast and broad viewing angles.

Vehicle-Specific Solutions

Our range includes meticulously designed sockets, gauges, and switches, available in various sizes specifically tailored for Toyota models.

Analogue Gauges

Forge ahead with confidence with HULK Professional Analogue Gauges. Customisable LED backlighting and versatile 52mm size ensure essential stats—fuel, water, oil pressure, turbo boost, and various temperatures—are at your fingertips. Outfitted with 10 vibrant LED backlight colour options, Day/Night Dimming for clear, dependable readings, they're the rugged, ready-to-adventure choice for any trailblazer's dashboard.

MONITOR YOUR VEHICLE'S VITAL SIGNS

Sockets & Plugs for Accessories

HULK 4X4 offers a comprehensive range of sockets and USB charging solution for the intrepid explorer. From robust 12V accessory sockets and crystal-clear RJ45 UHF radio connections to versatile Engel and Merit DIN compatibility—and quick-charge USB options—keeping you powered and connected in the most remote locations.

Scan QR code for full range

Mount Housings

HULK 4X4 Mount Housings deliver the ultimate in seamless socket and gauge integration for adventurers. Choose our flush mount for a sleek look or the surface mount for easy access, ensuring robust and reliable setup on any adventure. Also available are housings with 50 Amp Anderson plug and various connectors included.

Scan QR code for full range

Battery Meter

HU6677B

HULK 4X4 LCD Battery Meter is essential for monitoring battery health in 4X4s, caravans, and trailers, offering clear, easy-to-read data on a durable LCD screen.

Push Button Switches

Upgrade your adventure vehicle effortlessly with HULK 4X4's Vehicle Specific Switches, designed for easy 12V accessory integration across popular models. No drilling needed, these sturdy switches offer customisable LED lighting and symbols, with hassle-free installation.
