ABOUT OUR COMPANY

A Brief Story About The Company

ADK Group Electric Inc. has been operating in the field of electrical contracting and power infrastructure since 2003. The company delivers comprehensive engineering and implementation services across industrial, commercial and public sector projects.

Our core expertise includes medium and low voltage electrical contracting, transformer plant installation, energy distribution systems, ENH line works, smart building solutions, factory electrical installations, automation systems, environmental lighting, lightning protection systems, and transformer maintenance services.

With a highly experienced engineering team and strong field capability, ADK Group ensures reliable execution, technical precision and full compliance with national regulations and international standards.

We prioritize quality, safety and timely project delivery while building long-term partnerships based on trust and performance.

VISION

To be a trusted leader in electrical contracting and power infrastructure, delivering sustainable, high-performance engineering solutions that shape the future of industry and energy.

MISSION

01

To design and implement reliable electrical and infrastructure systems that meet the highest engineering standards.

02

To deliver projects with precision, safety and operational discipline across industrial and commercial sectors.

2026

03

To build long-term partnerships through transparency, technical excellence and consistent performance.

04

To continuously improve our engineering capabilities and contribute to sustainable energy and infrastructure development.

55	Green Enerji	ADP & Compensation & MCC Panel Assembly Works, Indoor Outdoor Lighting Systems, Camera Systems, Fire Alarm Systems, Faraday Cage System, UPS Assembly and Installation Works, Lightning Rod Installation, Communication Systems • Mikron's : 10MVA Transformer Maintenance, 15 MV Cell Maintenance
56	Mikron's	10MVA Transformer Maintenance, 15 MV Cell Maintenance
57	Petka Kalıp	OG Cell Maintenance
58	Starpak	Cold Storage Lighting Works, In Plant Pan and LV Cabling Works
59	Ölke Tarım	Cold Storage Lighting Works, In Plant Pan and LV Cabling Works

THANK YOU

Engineering Stronger Infrastructure for Tomorrow

ADK Group delivers comprehensive electrical contracting and power infrastructure solutions with a commitment to technical precision, operational discipline and long-term reliability.

With a highly experienced engineering team and strong field capability, we execute projects in full compliance with international standards and national regulations.

From medium and low voltage installations to transformer centers, energy distribution networks and industrial electrical systems, we provide dependable solutions built for performance and sustainability.

We remain ready to support your future infrastructure investments with confidence and engineering excellence.
