

Disgo Wild West Show Fair Show Tech Requirements:

1. Performance Area:

- Outdoor stage or performance area with a minimum size of 30 feet wide by 30 feet deep.
- Clear height of at least 20 feet above the stage for aerial effects or props.
- Sturdy and level surface for the stage to ensure safety during performances.

2. Power Supply:

- Access to sufficient power outlets for lighting, sound, and special effects equipment. 110 Volt

3. Lighting:

- Basic stage wash lighting to illuminate the performance area after dark.
-

4. Props and Set Pieces:

- Secure storage space for props, illusions, and set pieces.
- Accessibility for moving large props on and off the stage during setup and teardown.

5. Special Effects:

- Access to a water source

6. Load-In and Load-Out:

- Convenient access for loading and unloading equipment and props.
- Assistance available for moving heavy or bulky items to and from the performance area.

7. Communication:

- Clear communication channels between the production team, fair organizers, and technical crew to coordinate logistics and ensure a smooth performance.

8. Weather Contingency Plan:

- Contingency plan in case of adverse weather conditions, including options for rescheduling or relocating the performance if necessary.

9. Audience Seating:

- Adequate seating or standing space for fair attendees to comfortably enjoy the show.
- Consideration for sightlines and audience visibility to ensure everyone can see and enjoy the performance.

Please review these requirements and ensure that the fair venue can accommodate them effectively. If you have any questions or need further assistance, please feel free to reach out. We're committed to delivering an unforgettable experience for fair attendees with the Disgo Wild West Show!
