### Log Specifications

#### ***Log Scale- International 1/4"***

#### **Species-**

Mixed Hardwood – Any Native Hardwood (No Poplar at this time). Please call for current pricing.

Hemlock – Please call for current pricing.

#### **Hardwood Log Requirements-**

- Length: 16'6"
- Trim Allowance: 5" Minimum
- Diameter: 10" Minimum, 36" Maximum on big end
- Two-inch sweep and crooks are acceptable; however, **each log must yield a full length 8" timber.**
- All knots and butt swells must be trimmed flush with the stem.
- Logs must be the product of fresh cut timber.
- Scaling Defects that will warrant a cull log include crooks, forks, rot, seams, shake, splits, sweep, voids, worm holes, and timber breaks.

#### **Hemlock Log Requirements-**

- Length: 16'6" & 20'6"
- Trim Allowance: 5" Minimum
- Diameter: 10" Minimum on 16'6" and 14" Minimum on 20'6"  
36" Maximum on big end
- Two-inch sweep and crooks are acceptable; however, **each log must yield a full length 8" timber on 16'6" logs and 12" timber on 20'6" logs.**
- All knots and butt swells must be trimmed flush with the stem.
- Logs must be the product of fresh cut timber.
- Scaling Defects that will warrant a cull log include crooks, forks, rot, seams, shake, splits, sweep, voids, worm holes, and timber breaks.

All cull logs are to be picked up within 2 weeks of being delivered or they will become the property of Maine Timber Mats.

All log scale decisions are final.
