

Collision Avoidance

In this application the collision avoidance unit is contained in a single unit with traffic light indication to both vehicles. At least one path is guaranteed to be red.

Other Applications

1. Loading Docks
2. Shipping Yards
3. Storage Facilities
4. Airports
5. Auto Lots
6. Parking Lots
7. Malls
8. Construction Zones
9. One lane bridges or one lane roads that must support two way traffic.
10. Modern Traffic Signals
11. Inductive loop traffic signal replacement.

Collision Avoidance Unit mounted at corner of building.
