

[23](#). "Large capacity ammunition feeding device" means a magazine, belt, drum, feed strip, or similar device, that has a capacity of, or that can be readily restored or converted to accept, more than ten rounds of ammunition; provided, however, that such term does not include an attached tubular device designed to accept, and capable of operating only with, .22 caliber rimfire ammunition

New York State Rifle & Pistol Ass'n v. Cuomo United States Court of Appeals for the Second Circuit December 9, 2014, Argued; October 19, 2015, Decided:

“This statutory language dates at least to the 1994 federal assault-weapons ban and later appeared in New York's 2000 law. As Chief Judge Skretny noted, there is no record evidence that it has given rise to confusion at any time in the past two decades.<sup>150</sup> This Court found a similar phrase in another gun law—"may readily be converted"—to be "sufficiently definite" as to provide "clear[] warn[ing]" of its meaning.<sup>151</sup>”

“<sup>151</sup> United States v. 16,179 Molso Italian .22 Caliber Winlee Derringer Convertible Starter Guns, 443 F.2d 463, 464-65 (2d Cir. 1971) (rejecting a vagueness challenge in a civil forfeiture context, and finding that the phrase clearly meant a gun "which can be converted by a relatively simple operation taking only a few minutes").”
