

Mueller Findings Submitted to DOJ

In the interest of both the country and office of the president, I suggest That someone have a conversation with anyone in the WH or DOJ to heed the following advice.

AG Whitaker on acceptance of the Mueller Report take the following steps:

1. Mueller, and his team, all sign under penalty of perjury, that all copies of the report and its work products have been surrendered to the AG. This includes written and printed documents, charts, digital audio, video and scripted records, emails, text messages, etc.
- 2 . Mueller is to certify that no copies of the report or any work products developed or referenced by the SCO or its partners have been distributed or transmitted to any other agency, person or device under penalty of perjury.
3. All laptops, workstations, servers, cell phones, tablets and the associated backup devices are to be surrendered to the AG. This includes external hard drives, tapes, flash drive, SSD Cards, etc.
5. Passwords to all accounts utilized by the SCO are to be provided to the AG; include any cloud storage used.
6. Immediately inspect that the devices surrendered have not been compromised. Access usernames and passwords are as submitted, devices have not been cleansed or scrubbed, data has not been transmitted to any other device.

This may seem overkill, but I assure you these steps are necessary to avoid future issues. AG should use the military to ensure compliance as the IG has found a severe lack of integrity at the FBI to ensure compliance to orders.
