## **Growth File**

**name_growth.txt:** this contains the crystal size versus time.

<u>Example</u>

```
0.28328E-09      1001.00
```

<u>General Example</u>

```
Simulation time  Total number of growth events at this simulation time
```

```
-Repeat for all points defined in simulation to output data, in
input.txt-
```
