

Simulation Summary Log

YYYYMMDD_HHMM_summary.csv: this is a summary of all the simulations performed when parameters have been varied (only produced by the graphical user interface version of *CrystalGrower*)

This file will contain a formatted summary of all the parameters used in a series of simulations. It can be opened in spreadsheet software for easily readability as it is a .csv file. Users can use this as a record of what parameter was varied across a simulation set, along with quickly looking up the value of a parameter for a particular simulation number.

	A	B	C	D
1		tile_var_0		
2	FAU_GUI_1	1		
3	FAU_GUI_2	2		
4	FAU_GUI_3	3		
5	FAU_GUI_4	4		
6	FAU_GUI_5	5		
7	FAU_GUI_6	6		
8	FAU_GUI_7	7		
9	FAU_GUI_8	8		
10	FAU_GUI_9	9		
11	FAU_GUI_10	10		

Example

```
,tile_var_0,  
FAU_GUI_1,1.0,  
FAU_GUI_2,2.0,  
FAU_GUI_3,3.0,  
FAU_GUI_4,4.0,
```

General Example

```
,Parameter to vary,  
Simulation name, varied parameter value,
```
