PRODUCTS WITH THIS SEAL ARE FOR HOME CARE USE

A NEW COSMETICS CONCEPT WITH A LOOK IN THE FUTURE

The importance of offering innovative, effective and safe, and also taking care of the environment, is what moves ECOLOGICAL COSMETICS ECCOS. Our products have the "Green" profile, following the global trend of environmentally friendly, biodegradable cosmetics, biosustainable and that cause a lower environmental impact.

BEAUTY, HEALTH AND WELL-BEING IN PERFECT TUNING

For professionals, know the product and its composition. This is what guarantees excellence in treatment. With this in mind, inspiring innovation and commitment with the environment, we launched the DERMO ECOLOGICA base, delicately formulated with original ingredients vegetable and raw materials certified with the Ecocert seal, thus ensuring safety, quick and effective results as a result of its natural characteristics. The base DERMO ECOLOGICA is structurally similar to hydrolipidic mantle of the skin.

SAFETY, TRANSPARENCY AND RESPECT FOR OTHERS OUR CLIENTS

Our products do not contain mineral oil. To perform the extraction of botanical active ingredients we use as a solvent vegetable glycerin instead of propylene glycol. In our formulas we do not use formaldehyde-releasing preservatives such as Imidazolidinyl Urea and DMDM Hydantoin, nor parabens. We are also free from paraffin and dye. Furthermore, don't we deprive ourselves of boldness and launch the FRAGRANCE SAFE, eliminating all possible allergenic substances, making it a safe and hypoallergenic essence. To show all the transparency, security and respect of company to our customers, we inform the dosage of active ingredients on product labels. We do not test our products on animals, as we respect them, as well as the all nature.

COMMITMENT, QUALITY AND TECHNOLOGY

ECCOS COSMÉTICOS ECOLOGICOS is committed with professional satisfaction and growth, respecting their characteristics and preferences. Our products are elaborated through science, nanotechnology and principles safe assets, which prioritize quality and promote effective changes.

"WE ARE MORE THAN ONE COSMETICS COMPANY, WE ARE A DISSEMINATOR OF CONSCIOUS PRODUCTS."

WHY DERMO ECOLOGICAL BASE?

Providing quick, safe and effective treatments is something that aesthetic professional is constantly searching. To know the quality and what makes up a cosmetic is extremely importance in achieving these results. In addition to the active ingredients that make up cosmetics, there are many other ingredients that guarantee its quality and efficiency. Among the most important is the cosmetic base, responsible for ensuring delivery of the asset to the correct location with the ideal concentration. The Dermo Ecológica Base is unique and exclusive to Eccos Cosmetics. Free from all possible harmful substances or that cause skin irritation, such as mineral oil, parabens, propylene glycol and formaldehyde-releasing preservatives, its composition is rich in botanical and certified ingredients with the Ecocert seal, which guarantees quick and insurance.

DIFFERENTIALS AND BENEFITS OF DERMO BASE ECOLOGICAL

The great difference of Base Dermo Ecológica is its structural similarity to the hydrolipidic mantle of the skin, a barrier that helps protect and keep the skin hydrated in order to achieve your balance. Due to this similarity, the Dermo Ecological Base can reach the deepest layers deep into the skin, resulting in better permeation of assets, thus making the treatment safer and more effective. In addition to not containing any harmful substances or cause irritation, Base Dermo Ecológica is rich in omegas 3, 6 and 9, which bring great benefit to the skin.

WHAT ARE HARMFUL SUBSTANCES TO THE SKIN?

Unfortunately, these substances are still found in vast majority of products, even famous brands. All of our products are 100% free of these substances. Check if your cosmetics are free of:

PARABENS: Preservatives present in numerous cosmetics. These substances are sensitizing and allergens, which can cause hormonal changes due to its estrogenic action. They should be avoided especially in spot and cellulite treatments.

PROPYLENE GLYCOL: It is the humectant most used by companies. Considered by allergists the main triggering allergic reactions caused by cosmetics.

FORMOL RELEAERS: These are preservatives that bring both irritation and sensitivity to the skin and FORMALDEHYDE, a carcinogen, present in several chemical products. Two Common Examples of Preservatives formaldehyde releasers are Imidazolidinyl Urea and DMDM Hydantoin.

MINERAL OIL: Present in most cosmetic foundations of famous companies. Causes plugged pores and oiliness on the skin, making it difficult for active ingredients to permeate reducing the results of cosmetics.

IMPORTANT

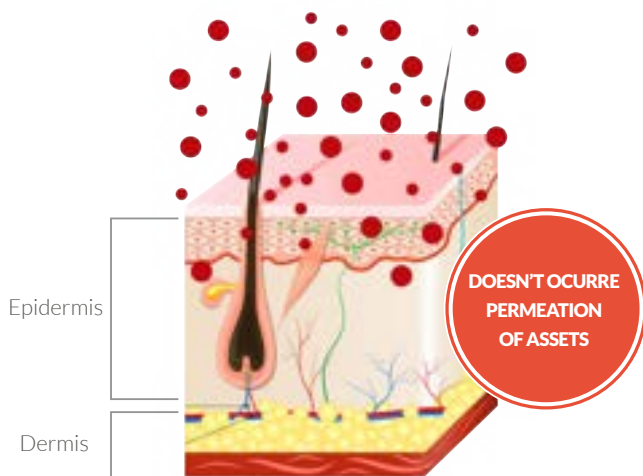

Vegetable Oil is extremely superior to Mineral Oil. It is rich in antioxidant nutrients and essential fatty acids, providing numerous benefits to the skin, in addition to being environmentally friendly.

TYPES OF OILS	VEGETABLE OIL	MINERAL OIL
ORIGIN	▶ Extracted from oilseed plants.	▶ Petrol destilation.
NUTRIENTS	▶ Antioxidants and Essential Fatty Acids (Omegas 3, 6 and 9).	▶ None.
BENEFITS	<ul style="list-style-type: none"> ▶ Allows skin breathing. ▶ Replenishes the skin's omegas (increases EFAs¹). ▶ Promotes real hydration (reduces TEWL²). ▶ Asset carrier. ▶ Renewable and sustainable source. 	<ul style="list-style-type: none"> ▶ Slice HandWork. ▶ Occlusion hydration.
RISKS	▶ There are no records.	<ul style="list-style-type: none"> ▶ Plugs pores. ▶ Prevents skin breathing. ▶ Promotes comedogenic acne- action. ▶ Does not permeate the fabric. ▶ Increases awareness.

¹ EFAs: Essential Fatty Acids. Two TEWL: Transepidermal water loss.

HYALURON FACTOR

FACIAL SERUM REPAIR

Formulated redensifying facial serum with eight types of Hyaluronic Acid with varying molecular weights that act on different layers of the skin. Has assets nanotechnology and vegetable polysaccharides which enhance firmness and hydration. In addition to improving elasticity, it stimulates collagen synthesis, has anti-wrinkle action and regenerative.

DIFFERENTIALS

- 8 Types of Hyaluronic Acid in a single product.
- First redensifying serum with growth factors and silicon organics in the world.
- Single that fills all layers of the skin with regenerating action.
- Repairer and Filler.
- Volumizing and Firming.
- Improves elasticity and reduces sagging.
- Stimulates the synthesis of hyaluronic acid endogenous and collagen.
- Deep anti-wrinkle action.
- Ultra Moisturizing Power.

ATIVOS

Average Yield: 50 applications

DIFFERENTIALS

- New depigmenting soap generation of acids preparatory to peeling.
- Unique with different types of acid, including all alpha hydroxy acids at maximum permitted concentrations.
- Removes impurities in the deepest layers deep into the skin and promotes peeling of the epidermis without irritating the skin.
- Perfect for renewing skin tone mature skins.
- Acts as a degreaser and oil remover.
- Inhibitor of tyrosinase and production of melanin.
- Combats hyperchromia and melasma.
- Combats oxidation and aging cell phone.
- Extremely keratolytic action deep.
- Perfect for skin with acne and acne of keloid.
- Acts in the renewal of the epidermis and unclogging pores.

NANO RETINOL LOTION

ACID LOTION

DIFFERENTIALS

- New depigmenting impact peeling generation of acids.
- Only serum with 18 different types of acids in maximum concentrations permitted in same formulation.
- Blocks melanin production.
- Combats hyperchromia and melasma.
- Combats oxidation and cellular aging.
- 80% of the formulation is acidic and inhibitory of tyrosinase.
- Extremely deep keratolytic action, combating skin oiliness.
- Acts in the renewal of the epidermis and unclogging pores.
- Anti-acne and anti-aging action for rejuvenation.
- Perfect for microneedling.

Extremely concentrated whitening lotion with the purest and most advanced technology nanoparticles. Carefully crafted for aesthetic peeling treatments, acne, rejuvenation, stretch marks and in any other treatment that requires action extreme keratolytic. Can be used in all skin phototypes (I to VI).

GLYCEROL RF

GLYCERINATED GEL FOR RADIOFREQUENCY

DIFFERENTIALS

- Universal gel for all types of electrotherapy equipment and radio frequency.
- Excellent moisturizing and gliding action.
- Extreme wetting power.
- Does not change consistency even when high temperatures.
- Feeling of comfort in any temperature.
- Ideal for radio frequency applications.
- Perfect as a contact gel for electrotherapy.
- Free from dyes and fragrance.

Glycerol RF Gel is intended to assist in the conduction of electric current and waves sonic in any and all devices that need a means of contact. Is indicated for medical, physiotherapeutic and aesthetic. Ideal for applying radiofrequency, as it maintains its consistency even when subjected to high temperatures, leaving a feeling of comfort during application. It has excellent moisturizing and sliding action.
