

**DISPATCHING MADE EASY – FACILITY
FUNCTIONALITY & OPERATION ORIENTATION**

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

A convenient feature of Dispatching Made Easy (DME) is the ability for facilities to scheduled trips directly online with their transportation provider partner.

The transportation provider is the “owner” of the account and will be responsible for creating an “Administrator” account that serves as the primary facility user.

Smaller independent facilities may only need one facility user account, but larger facilities with multiple units, floors, communities, or buildings may require multiple sub-user accounts.

The facility’s primary user (Administrator) will be responsible for creating and managing all unique sub-user accounts. The transportation provider will not create facility sub-user accounts.

NOTE 1: Should a new facility sub-user account need to be created or a sub-user is experiencing login problems, it will be the responsibility of the primary facility user to edit and update the account and NOT the transportation provider. The transportation provider can only see and access the credentials of the primary facility user and NOT sub-users.

NOTE 2: When creating new accounts, always create unique usernames. For security purposes, there can be no duplication of usernames throughout the entire DME platform.

In addition to this resource, the transportation provider will be responsible for teaching and orienting facility users on the particulars of DME.

Using the new credentials created by the transportation provider, the facility primary user can login at <https://www.DMELive.com> to create facility sub-user accounts, add resident profiles, create and manage trips, and more.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

After entering all applicable sub-user information, select “Save.”

Note 3: To ensure there is no confusion between sub-users, we highly recommend the primary facility user uniquely labels or names each respective floor, unit, or department. When the sub-user logs into their unique account, their respective unit or department will be reflected at the top of their account.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

The primary facility user and all sub-user accounts, essentially, experience the same functionality. They can all create new resident profiles, submit trips online to the transportation provider, and once accepted, facility staff can view the status of each trip.

For demonstration purposes, we will return to the primary facility user account.

Once logged in, the user will navigate to the “Resident” tab to create a new Resident profile.

If the Resident is already in the database the user will go directly to “Trip Management” to create a new trip.

Under “Resident Management,” the user will enter the name, demographics, billing, and all applicable information.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

Once a resident has been successfully “Saved” to the facility database, the facility user can navigate to the “Trip Management” tab. When the user begins entering the last name of the resident, their name will appear and filter alphabetizing from a drop-down menu allowing the user to select the desired resident.

Once selected, the resident profile information will populate. The facility user can then enter additional trip details.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

When a facility user creates and “Saves” a trip, the transportation provider automatically receives a visual notification in the form of the green tab at the bottom left of their screen. This notification clearly captures the attention of the transportation provider dispatcher and prompts them to click and review.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

Once confirmed, the trip will populate in the Daily Schedule of both the transportation provider and the facility account.

If the resident is a new customer and not yet in the transportation provider’s database, the resident will automatically be added to the transportation provider’s Customer database.

Once a driver has been assigned to the trip, it will appear in Dispatching Grids of both the transportation provider and the facility.

DISPATCHING MADE EASY – FACILITY FUNCTIONALITY & OPERATION ORIENTATION

Like the transportation provider, facility staff can view all aspects of the trip progress on the Dispatching Grid and Daily Schedule. However, the facility can ONLY see trips relating to their residents and not of any other facility or customers. Further, a facility’s Dispatching Grid and Daily Schedules are “View-ONLY.” Facilities cannot engage in or manipulate trip status in any way.
