NO
TO**

CANFORD INCINERATOR

Please sign the petition to BCP asking them to refuse the application to build an incinerator at Canford Magna :

**We ask BCP Planning Committee (West)
to refuse the application to build
an incinerator at Canford Magna**

The incinerator would be: - harmful, in its emissions to human health and harmful to the eco-system of the adjacent Canford Heath (an SSSI);

- a contributor, in its emissions of CO₂, to climate change;
- a cause of further congestion on Magna Road ;
- a visual harm, with its 110 metre chimney, in an area with many heritage assets (Canford Magna) ;
- a danger to air traffic using nearby Bournemouth Airport

YOUR VOICE MATTERS

STOP CANFORD INCINERATOR!

.....

Incineration is marketed as a low carbon energy from waste. Incinerators typically emit more CO2 per unit of electricity than coal fire stations. Every tonne of household waste burnt contributes around a tonne of CO2 released into the atmosphere. It's the dirtiest form of power

In addition to greenhouse gas emissions that exacerbate climate change, incinerators emit many toxins and pollutants that harm local air quality. Emissions include dioxins, NOx and ultrafine particulate matter that can be harmful to both human health and the natural environment.

.....

Children are particularly at risk from air pollution as their immune systems lungs and brains are still developing. Canford incinerator would burn 260,000 tonnes of waste 24/7 every year

.....

Depending on the time of day, air temperature and wind conditions, it's predicted its emissions will travel over a distance of 10,000 metres

PLEASE SIGN PETITION TO BCP AT

To be eligible to sign you need to live, work or study in BCP. The petition is active until 1st April, at which point the case officer for APP/23/00822/F will be advised of the total number of respondents.
