

# Angle Walk

We do the angle walk

\_\_\_\_\_ is the only one who needs to talk

Show your right angles

Now your acute

Okay we are loose, show obtuse

Make a straight line

Everyone is looking fine

We do the angle walk

\_\_\_\_\_ is the only one who needs to talk

Back to acute, now right

This is so tight

Give me a 180 line

Gotta love it when I rhyme

Go back to greater than ninety

Remember it's not tiny

We do the angle walk

\_\_\_\_\_ is the only one who needs to talk

Now try  $9 \times 5$

Make that math come alive

As we finish our transition,

Give me any angle position!!!

You crushed to angle walk

Thank you for letting me talk!!
