

BinGRAPHo!!!

_____ is wonderful!!!!

Directions: You will need two different colored markers. Using one marker, plot 12 points on the graph. Put this marker away. Get out your other color. As coordinates are being called out, plot the points. When any of your 12 coordinates are called out, put an X over it. Shout out BinGRAPHo when you have 3 X's anywhere on the coordinate plane!

Please write the ordered pairs you put in each quadrant or on each axis.

I _____

II _____

III _____

IV _____

x-axis _____

y-axis _____
