ALL-STAR®

TOOLS OF IGNORANCE THEY SAY.

Not on our watch. We have the most skilled minds in the industry making sure you have the most intelligent gear in the game. Precision is our passion and pros choose All-Star® not out of ignorance, but experience. When you experience the precision of the legendary CM3000 in your

hand, our patented Linq® system on your knee, or the care-free fit of our Delta Flex® Harness you experience what the pros wear.

We know when you're behind the plate grinding away at the game, the game grinds away at you. Catching ain't easy - thumb jams, foul ball mask impacts, wrist and forearm blocks, back swings, home plate collisions...you name it, this position hurts. Oh and the squatting... so

much squatting. And yet with all these distractions you get out there, you champion the field, and lead the team. Since 1960 we've been grinding away too, pioneering the protective equipment, from T-Ball to Pro-Ball, that keep you in the game.

We might not be the first brand you try, but as your skills move forward and your backstop journey rises above, All-Star is here to make sure you're protected in intelligence.

MVP-PRO

The game is changing. Catchers must adapt and so should their gear. Pitchers are throwing harder with more movement. The wild pitches are getting wilder (not to mention the backswings). Catchers equipment must provide confidence to react without question or distraction. Unrestrained, secure, and of course protected.

All eyes look to All-Star® for innovation in catchers protection. Over 60 years of product innovation, collaboration with pro players, designers, engineers, and independent test labs has led us to the MVP-PRO™ kit. This gear is our

sign to the baseball world that we have entered a new era in catching.

Catchers are facing bat and ball impacts from all angles. The MVP-PRO™ Helmet is the choice of most professional catchers because it has Deflexion® shock hammocks that disperse energy from direct impacts. The I-BAR BSP® cage provides back swing protection for coverage against wild swings.

The MVP-PRO™ Chest Protector is designed to help you adapt to the evolution of the catcher position so

you can be faster, more protected, and secure even the wildest pitches. Our new 3DU BAR® technology increases the blocking area by 50% enabling you to keep everything in front.

The MVP-PRO™ Leg Guards are specifically designed for the 1KD (One Knee Down) stance. It's about time catchers had gear that provided the added flexibility to work the zone and increase their responsiveness. Our revolutionary SHIFT™ technology moves with you to cover more of the thigh for better 1KD protection.

3DU BARS

Revolutionary 3DU BAR® technology increases the blocking area by 50% to keep blocked balls within arm's reach. Tough bounces to the sides that would normally result in the ball getting away are instead redirected so you can recover the ball and keep runners from advancing.

LINQ

The next generation LINQ X™ pivoting hinge system allows a player to strap these on and completely forget about them while blocking, throwing, and running. The interlocking knee and thigh components offer specialized coverage for the areas exposed in the 1KD stance. The hinge design rotates with your knee through the entire range of flexion for uncompromised fit and security.

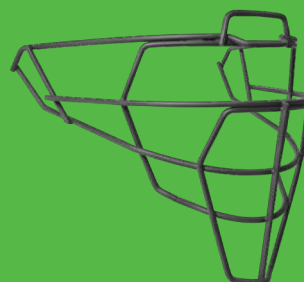

3D AIRMESH

Laser cut foam panels and oversized 3D Airmesh™ padding reduce weight and dramatically increase ventilation.

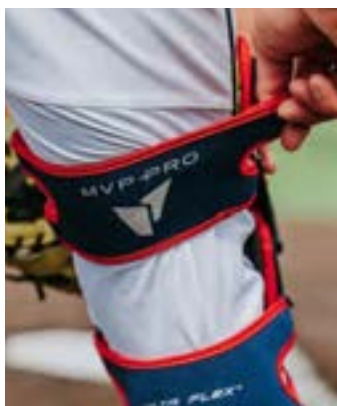

I-BAR-BSP

Back Swing Protection™ (BSP) can now be found on the All-Star® MVP-PRO™ Helmet. With the evolution of the swing-path, back swings are a serious threat to player safety. Our next generation cage is designed to extend past the ear for protection against unintended impacts.

The completely redesigned Delta Flex® Chest Protector Harness System ensures a firm yet breathable fit with maximum mobility.

DELTA FLEX

No more strap strain! Innovative DELTA FLEX® Calf Harnesses clip directly to the leg guard for the most secure and comfortable fit in baseball history.

CON4M FIT TECH

CON4M® Fit Tech features a formable collarbone protection zone for a the perfect customizable fit.

The demands of the one knee down stance require the ability to adjust the length of individual leg guards. CON4M® allows you to customize the shin length up to 1" for the perfect fit.

The CON4M® Clip System features direct connect straps for a tight low-profile fit, with minimal hardware.

SHIFT

Interior padding stays connected to your thigh while an exterior shield moves with you to cover more of your thigh for better 1KD protection.

Pro-Elite

If it ain't broke, don't fix it. That's what we hear from the pros. The exceptional leather and proven pattern make our Pro-Elite® mitts the choice of serious catchers. Our players remain loyal to our mitts because they choose the tools of excellence.

Our tan leather is more supple than our black leather. Our tan leather forms a great pocket and has a loud pop that pitchers love. The black leather on the back provides stability throughout the season.

Our solid black mitts have increased in popularity recently. The professional focus team members tell us that pitchers are throwing harder each year.

There's been a big shift from our 33.5" mitt to our 34" size. Again, we hear from our focus team that pitchers are not only throwing harder but they have more movement. The small increase in size provides a little margin for error and perhaps some peace of mind.

THE PRO-ELITE® JAPAN SERIES CATCHERS MITTS

The Pro-Elite® Japan Series mitts are different from anything you have ever put on your hand. The finger stalls are shifted to the left creating a rotated hand pattern that allows

you to present the pocket without over-rotating your hand. These mitts are lighter too which means you can receive from the bottom of the zone with much less forearm fatigue. Faster mitt speed means more balls converted to strikes.

The low-profile pinky and thumb construction creates a significantly larger pocket than standard American catcher's mitts. With more pocket to work with, the functional catching area increases dramatically so that you can

pull pitches more effectively. Feedback from the pros is that these mitts have a larger sweet spot. Premium Japanese HIMEJI leather adds to the comfort factor.

Why is the web loose? This traditional Japanese loose webbing speeds up the break-in process. Catchers in Japan start with the break-in process with the web loose. As the mitt starts to take shape, they begin to gradually tighten the web to their preferred level.

CMW-PHX Two years of development time was spent on this Paige Halstead x All-Star® catchers mitt. We started from the ground up – analyzing the catching position and the good, bad, and ugly of softball catching mitts in the industry. Core to Paige's personality, she wanted a legit glove that would be built to last and hold up to the constant demand placed on catchers. The final result is an *amazing* professional softball mitt with several industry firsts.

DESIGNED FOR ALL HANDS WITH GLOVELOCKS™ We hear it all the time: wrist closures don't stay tight enough. We developed a very simple solution that allows this mitt to fit the smallest to the largest hands. Simply pull two rawhide laces as tight as you need – then, *GET LOCKED IN!* with the included GloveLocks™.

POCKET ADJUSTABILITY With two simple lace adjustments, the depth of the pocket can be easily customized. Controlling the ball with security is the key especially with today's pitchers spinning the ball like never before. This mitt allows any catcher to set the pocket depth she prefers before the first catch and even with each pitching change. This innovation also helps eliminate ball drops while breaking in the mitt.
