SOLAR PROJECT COMPLETED

Waterbury OIC has gone solar! New solar panels were added to our building—reducing energy costs, cutting our carbon footprint, and helping us model sustainability for the community. This upgrade allows us to reinvest savings into workforce training and youth programs that build a brighter, greener future for Waterbury.

WOIC IN THE COMMUNITY

Waterbury OIC continues to stay connected and engaged throughout the city! This month, our team joined community partners at the Connecticut Community Foundation Annual Meeting, celebrating local impact and collaboration. We also spent time at the NEST Community Garden, supporting neighborhood revitalization and green space initiatives, and visited the YMCA, strengthening our shared commitment to youth development and healthy living. Together, we're building a stronger, more connected Waterbury—one partnership at a time.
