Plot

1. The Movie opens with Tom Thumb doing calculations on a massive computer, looking very nervous. Mysterium teleports in and tells him that he is justified in his fear, as the 712 universe in which they live is headed for destruction. The squadron is called together and they formulate a plan to evacuate the planet but soon realize they don't have the time. Mysterium and Tom then instead try to transport the team to another universe. Only a handful make it to the MCU. They are Mysterium, Tom Thumb, Hyperion, Power Princess, Arcanna, Whizzer, The Black Archer, Nuke, Lady Lark. And Nighthawk. They decide to lay low because of the damage they caused in their previous universe, of which was taking over the earth's government and many heroes, villains, and innocents perished. Unbeknownst to them, Overmind also traveled over, who was their greatest foe.
2. 2 years later, Nighthawk, who has slowly become wealthy, becomes a congressman. He sees a battle on TV between the Military and Hyperion. The problem is that it's not his Hyperion. He realizes that The Avengers are off the grid, and decides to locate the squadron members to take down the imposter.
3. Unable to locate his Hyperion, he locates other squadron members P. Princess, Arcanna, Doctor Spectrum, Whizzer, and Nuke. They find the variant and battle, only to be defeated, with the whizzer having his legs broken, and nuke being killed.
4. Nighthawk leads Zarda to a secret military facility, where he tells her Hyperion is kept. She is puzzled and angry as he had told her previously that he could not locate him. However he shows that it is another variant, and the two retrieve him and convince him to help. This Hyperion was captured by A.I.M. during the events of The Multiverse Of Madness. and has been kept as a secret weapon, yet to be used. It is assumed that is how evil Hyperion entered the MCU as well, through a multiversal rift. Only he was not

captured. This puzzles Nighthawk as to why he has made his presence known now. He wonders if this has anything to do with recent disappearances of government figures and others acting strangely and out of character.

5. A second battle ensues when Variant 1 Hyperion shows up with a variant of Arcanna and Doctor Spectrum, as well as Tom Thumb, and The Black Archer. Nighthawk quickly realizes that their foes are under mind control and deduces that it is Overmind. He slips away from the battle and finds Overmind and attempts to defeat him, thus shutting down the mind control. During the course of the battle, Zarda, Doctor Spectrum, and Arcanna are being beat down and Evil Hyperion is close to landing the final kill blow on variant Hyperion. Help soon arrives in the form of Original Hyperion and the tide soon turns. Nighthawk is able to defeat Overmind, and the ones he controlled stop fighting, except for one, Evil Hyperion. He laughs at the thought that a moron like Overmind could control him. He was a means to an end for him to conquer the planet and kill all that opposed him. In a final battle, he is defeated and crippled by the other two Hyperions.
6. Nighthawk notes to the Squadron, now back together fully that the government seems to have returned to normal. As Overmind is locked away, he tells Nighthawk that their win was only temporary, as his master is coming, The Scarlett Centurion, a variant of Kang. Wondering what to do with Variant Hyperion, Mysterium appears and tells them that he has learned a few tricks while in this universe and can help send him back to his home universe, though there are some out there that will not be happy with the act. Original Doctor Spectrum and Arcanna decide to go with him, as his earth did not have a Squadron Supreme. The rest of the team decide to stay and prepare for what is to come and whoever this Scarlet Centurion is.
