NEUTRON SHIELDED DOORS

*powered by Brookfield Hinges and Operator

Elevating Radiation Protection through Proven Expertise

BENEFITS

- Unparalleled Radiation Shielding:** Lambert's Neutron Shielded Door, Frame and Operator, establishes a trusted paradigm in radiation containment, prioritizing personnel safety and environmental protection.
- Reliable Performance:** The rigor of Lambert's precision manufacturing, since 1998, guarantees consistent, reliable operation, exceeding industry expectations.
- Precision Access Control:** Brookfield's operator offers seamless and controlled access, optimizing workflow efficiency within radiological spaces minimizing disruptions.

WHY CHOOSE US?

- Lambert is a pioneer in radiation protection solutions since 1948.
- For over two decades, has been delivering exclusive long-lasting neutron doors.
- Canadian Manufacturers who specialize in Quality over Quantity production.
- We are adaptable to make design changes to meet jobsite conditions.

CONTACT US

UNCOMPROMISED NEUTRON ATTENUATION

Fusing Lambert's advanced shielding experience with precision engineering, our system ensures superior neutron attenuation, effectively reducing radiation exposure in radiological environments.

ENDURING CONSTRUCTION

Building upon our legacy of exclusive long-lasting neutron doors guarantees a robust solution engineered for prolonged performance and resilience.

SEAMLESS INTEGRATION

Brookfield's operator seamlessly integrates with our shielding system, delivering intuitive control and secure access to LINAC/Cyclotron vaults. This user-centric design enhances operational efficiency.

NEUTRON SHIELDED DOORS

APPLICATION AREAS

High Energy

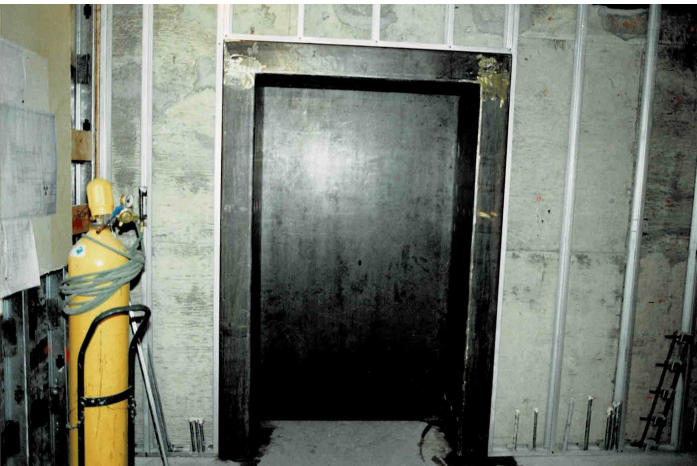

- Enhance radiation therapy vaults, treatment centers, and research labs with our advanced shielding solutions.

Research

- Safeguard sensitive research areas upholding stringent radiation containment standards.

Industrial

- Ensure worker safety and equipment protection in radiation-involved industrial applications, supported by our proven history of safety innovations.

CUSTOM DESIGN

At Lambert Radiation, we understand that every radiological environment is unique. That's why our Neutron Shielded Door, Frame, and Operator system offers unparalleled versatility through customizable options.

Whether it's adjusting size, refining shielding specifications, or tailoring the installation method, we put you in control to ensure the perfect fit for your distinct needs.
