

Crossblock Dispenser

Product Description

The Crossblock Dispenser houses up to 300 Crossblock stethoscope covers. These covers provide an effective, practical and low-cost solution to decrease Healthcare Associated Infections (HAIs). Stethoscope contamination occurs after a single physical examination and current decontamination compliance is poor. Multiple studies show stethoscopes threaten patients by transmitting pathogenic organisms that cause HAIs, a significant cause of patient morbidity and mortality. Setting a new standard for patient safety. Crossblock is a practical solution for Hospitals, Long Term Care Facilities, Physician Offices, Humanitarian Operations and other medical centers.

Details

- Part Number M329-1 Crossblock Dispenser
- NSN: Pending
- Price: \$294 per box of 6
- Unit of Issue: U/I 6/shipping box (8" x 13" x 14")
- Cage Code: 8MGG5
- Service Life 3 years
- Weight U/I 1.2lbs. EA
- Cube: (H x W x D) 6.5" x 7.5" x 4" EA
- High quality plastic multiuse dispenser; refillable with Crossblock film cartridge

Benefits and Attributes

- Effective, inexpensive, disposable stethoscope cover for use with each separate patient.
- Simple, intuitive hands-free application and removal
- Easily mounted on wall in treatment rooms or at bedside
- Applies in seconds
- Fits all common stethoscopes
- Highly visible to increase patient confidence and aid in compliance
