BREAKING NEWS

2026: TIME TO EXPAND

Wow! 20 years went by in the blink of an eye. We as a company have had many exciting things happen in that span. Built a new seed corn drying facility in 2013, added a new warehouse in 2017, a new platform scale for bulk seed in 2018, and currently just completing a new expansion of the current warehouse and addition of office space for personnel and company meetings with customers. All this was possible because of the continued support from our customers and company sales representatives; we could not accomplish this without you. So I want to say first and foremost, Thank You! Through the years one focus has been front and center, to provide the highest quality corn hybrids and soybean varieties in the industry at a fair price. I know directly that our customers need to be highly profitable or our company does not exist. As M&W Seeds continues to expand into new innovations and new products one mindset will never waiver for us: The success of our customers! Thank you so much for the continued support.

M&W Seeds Numbering System

Corn

Product Ratings are based on the average performance of a hybrid grown over a wide range of climate and soil conditions. Extreme conditions may adversely affect the performance of these hybrids.

Product Rating Scale:	9 = Excellent	5 = Average	1 = Poor		
Plant Type:	T = Tall	MT = Medium Tall	M = Medium	MS = Medium Short	
Ear Type:	F = Flexible	SF = Semi Flex	SD = Semi Determinate	D = Determinate	
Traits:	VT2P = VT Double PRO [®]	PWR = Powercore [®] Enlist [®]	DV = DuracadeViptera [™]	TRE = Trecepta [®]	CNV = Conventional

MW F98 PWR

- The letters MW are the letters given to the product at introduction
- The F represents the year of introduction
- The number 98 represents the maturity within the range.
Ex: The higher the number, the later the maturity within the range
- The PWR represents the trait package

MW 103A VT2P

- The letters MW are the letters given to the product at introduction
- The number 103 represents the maturity within the range.
Ex: The higher the number, the later the maturity within the range
- The A represents the year of introduction
- The VT2P represents the trait package

46T29

- The number 4 denotes that this is a corn hybrid
- The number 6 denotes the maturity range of the hybrid
- The letter T is the letter given to the product at introduction
- The number 29 represents the maturity within the range.
Ex: The higher the number, the later the maturity within the range

Soybeans

Plant Type:	T = Thin	M = Medium Bush	B = Bush
Flower Color:	W = White	P = Purple	
Hilum Color:	Bl = Black	T = Tan	IB = Imperfect Black
Pod Color:	T = Tan	Br = Brown	Bf = Buff
Pubesence:	T = Tawny	G = Gray	LT = Light Tawny
RSP Type:	NG = No Gene		

26M81 GT or 27E40 E3

- The first two numerals represent the maturity group of the soybean variety Ex: 2.6 & 2.7
- The letters M or E are the letters given to the product at introduction
- The last two numerals represent the maturity range within the group
- The GT and E3 denotes the traits of the variety

White Mold, Brown Steam Rot, SDS, Emergence, Standability, Phytophthora Field Tolerance are on a 1-9 scale:

1 = Poor 5 = Average 9 = Excellent

MW F93 DV		This new DuracadeViptera™ hybrid has exceptional eye appeal with high yield potential. Girthy flex ears give it consist performance across many enviroments.	93	1235	2320	MT	
MW A96 PWR		This PowerCore®Enlist® hybrid has outstanding late season eye appeal, it provides deep kernels with girthy ear style. Position on medium to better soils.	96	1265	2395	T	
MW D96 PWR		Exceptional yield performance across variable soil conditions, with great late season stalks and plant health. Moves south out of zone well	96	1235	2400	M	
MW F98 PWR		Outstanding disease tolerance including tar spot make this hybrid a big-time performer. Excels on medium and lighter soils.	98	1245	2390	MT	
MW 98A TRE		This robust hybrid has a large girthy ear with deep kernels, allowing a wide range of populations. It is an exceptional performer in the Trecepta trait package, with dual purpose ability.	98	1260	2450	MT	
46T29		Big, tall, robust hybrid with good stalks and roots. Very good test weight with solid disease package. Best suited in zone and north.	99	1237	2412	T	
MW F102 TRE		Medium statured Trecepta hybrid with girthy ear style give way for a big-time yield punch.	102	1240	2550	M	
MW 103A VT2P		Excellent top end yield potential for productive acres. Rated very good for stress tolerance and excellent drought tolerance. Excellent dry down allows northern movement.	103	1320	2600	M	
MW F104 PWR		Good stress tolerance gives this hybrid rock solid yield in both high and low yielding environments.	104	1250	2570	M	
MW G107 PWR		Every ear counts on this medium height hybrid. Strong seedling vigor, agronomics and looks good at the end of the season. Excellent stalk strength.	107	1260	2640	M	
MW G108 PWR		Yield and plant health. Likes high productize soils and high populations. Strong disease resistance.Dual purpose hybrid.	108	1340	2260	MT

Organic 1R – Seed Treatment

Organic 1R seed treatment is an organic, Humic Acid product from naturally occurring, highest quality mined Leonardite for conventional and organic seed. It is non toxic and safe to handle. Our 1R seed treatment is OMRI approved for organic production. It does not contain microbes or bacteria. M&W Seeds treats all conventional hybrids intended for organic production with 1R seed treatment

SoilBiotics®

MADE IN THE
USA

Rev. 8/28/2023

All 1R treated conventional corn hybrids should be ordered early, and are limited in supply

M&W Titan 250

M&W Titan 250 seed treatment is a premium corn seed treatment designed for early season planting environments. It includes three fungicides, an insecticide, a biological nematicide and a root growth enhancing bacteria. Titan 250 seed treatment is designed to protect corn seedlings from diseases and pests, ensuring a healthy crop start to reach it's full genetic potential

***Ratings are based on a 1-9 scale, with 9 = Excellent 5 = Average 1 = Poor**

-Specialized Dairy Forage are hybrids, just as the name suggests, developed specifically for dairy use.

-SDF hybrids have an emphasis on fiber digestibility, plant health, yield, sugar content, and low test weight highly digestible starch.

-SDF hybrids are all flex ear hybrids bred not just for ear flex, but also full plant flex to maximize yield, quality, and provide long harvest windows and shorter required storage periods.

Specialized Dairy Forage

Root Strength	Stalk Strength	Drought Tolerance	Early Vigor	Gray Leaf Spot	Goss Wilt	Northern Corn Leaf Blight	Common Rust	Tar Spot Tolerance
6	6	7	8	N/A	N/A	7	7	5
7	7	8	8	N/A	N/A	5	7	5
7	8	8	8	N/A	N/A	5	7	5
7	5	8	8	N/A	N/A	7	7	5
7	5	8	8	N/A	N/A	5	7	5

Seed products with the LibertyLink®(LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, nonselective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM

ON-TARGET APPLICATIONS: | 90% less drift than traditional 2,4-D | 96% less volatile than 2,4-D ester

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

SOYBEANS | 2,4-D choline | Glyphosate | Glufosinate
CORN | 2,4-D choline | Glyphosate | Glufosinate | FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance
- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

* Enlist Duo, Enlist One and the PowerCore Enlist Logo are trademarks of Corteva Agriscience and its affiliated companies. PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. PowerCore® is a registered trademark of Monsanto Technology LLC. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.T. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Product responses can vary by location, pest population, environmental conditions, and agricultural practices. Please contact your Corteva Agriscience sales professional for information and suggestions specific to your operation. Individual results may vary. Various factors, including pest pressure, reduced susceptibility, and insect resistance in some pest populations may affect efficacy of certain corn technology products in some regions. To help extend durability of these technologies, Corteva Agriscience recommends you implement Integrated Pest Management (IPM) practices such as crop rotation, cultural and biological control tactics (including rotating sources of Bt-protected corn traits), pest scouting, and appropriate use of pest thresholds when employing management practices such as insecticide application. You must also plant the required refuge when using these technologies. Please contact your sales professional or consult with your local university extension for more information regarding insect resistance management guidelines, best management practices and to understand whether there has been a shift in susceptibility or insect resistance with certain pests documented in your area. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of BASF. Always read and follow label directions. © 2024 M&W SEEDS INC

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to these herbicides. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, Trecepta®, and VT Double PRO® are trademarks of Bayer Group

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

Relative Maturity

Soybean Varieties

NEW! 17E11 E3	Loads up with pods in highly productive soils. Semi Bush plant that needs to be managed for white mold.		1.7	
18E70 E3	Great looking variety with unique Phytophthora 3a gene. Stands in productive soils.		1.8	
21E80 E3	Strong finishing variety for high yield environments. Defensive package with strong white mold, Phytophthora and SCN.		2.1	
NEW! 24E45 E3	Impressive combination of yield and agronomics. Shows versatility in all soil conditions. Unique 3a Phytophthora resistance.		2.4	
25E25 E3	This variety packs a punch every year. Impressive key line with eye catching yield performance across all soils.		2.5	
26M81 GT	Tall, rugged variety with outstanding stress tolerance. Very high yielding potential variety that is a must have for your farm. GT tolerance offers a better ROI for your farm.	GLYPHOSPHATE RESISTANCE	2.6	
27E40 E3	Rock Star yielding variety with strong agronomics. Narrow type plant helps with white mold.		2.7	
NEW! 29E50 E3	Yield comes from great defense. Peking SCN, strong SDS and white mold scores. Lower pops for better stand ability.		2.9	
NEW! 31E85 E3	Attractive soybean you can plant anywhere. Peking option and strong SDS.		3.1

M&W TITAN SEED TREATMENT

BIG PERFORMANCE. ONE EASY APPLICATION.

M&W TITAN SEED TREATMENT is a premium treatment designed for early-season planting environments. A unique blend of fungicides cover all early season pressures, while Flo-Rite® 2805 ensures maximum flowability in your planter and N-Durance™ provides advanced root hair growth and development, increased nodulation and higher yields.

A premium soybean inoculant with the biological yield enhancer Azospirillum

Increased Nitrogen fixation from both Azospirillum & Brady Rhizobium

Four fungicides, insecticide and a biostimulant

Two modes of action for Pythium and Rhizoctonia

Higher rate of protection against fusarium

Maximum flowability with Flo-Rite® 2805

Mitigates season-long stress

Premium BASF® color & polymer

SCN protection

Enlist E3[®] soybeans

Exceptional weed control. Ease of use. Excellent yield.

Enlist E3[®] soybeans offer the most advanced trait technology available in soybeans, providing a new standard for weed control and yield performance. Get access to more herbicides featuring effective sites of action for better weed control this year and in future years.

One system stands alone – get the weed control that you deserve.

Wide application window

Enlist E3[®] soybeans

Through R1 growth stage

Enlist E3[®] soybeans have no plant-back restrictions after using an Enlist[®] herbicide for burndown.

Adding the Enlist[®] weed control system to your operation is simple.

- Enlist E3 soybeans are compatible with nearby crops, such as **soybeans without the Enlist[®] trait, alfalfa, corn, peanuts, sorghum, rice and wheat**. You can apply Enlist herbicides on Enlist E3 soybeans planted right next to these compatible crops with no wind directional restrictions.
- A wide application window and the versatility of Enlist herbicides make them easy to incorporate into your weed management plan.

Apply with confidence to take down the toughest weeds, including:

Common ragweed

Giant ragweed

Morningglory

Palmer amaranth¹

Marestail¹

Velvetleaf

Lambsquarters

Waterhemp¹

¹ May require a broader management plan including timely application and use of a soil residual herbicide.

"The genetics were top-notch. The Enlist beans yielded really good and met my expectations."

Kevin Miller | Ohio soybean farmer

"After application, I could see no evidence at all on the beans. There was no burn or wrinkling of leaves at all. The crop tolerance is a big value."

Josh Turner | Missouri soybean farmer

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and re-plant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.traitstewardship.com

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.traitstewardship.com to download the latest Corteva Agriscience Corn Product Use Guide.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE AND COUNTY OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

Products that Profit

Take Control Across Every Stage of Your Crop

From early nutrition to in-season applications, these products are selected to support corn and soybean performance, enhancing nutrient efficiency, supporting plant health, and fitting alongside your existing practices.

Planter Box	BRANDT® EnzUp® SeedFlow™ Zn - Enzyme and Zn treatment designed to support early vigor and seed fluency
	BRANDT® HomeLAND® Soybean - Soybean specific treatment with micronutrients and biologicals for early development
Starter	BRANDT EnzUp P DS - Enzyme-enhanced starter designed to improve phosphorus availability and early growth
	BRANDT EnzUp K DS - Enzyme-enhanced starter to support early vigor and potassium nutrition
Foliar Nutrition	BRANDT® Smart Trio® - Foliar nutrition with B, Mn, and Zn for balanced crop nutrition
	BRANDT® Smart Quatro® Plus - Multi-micronutrient foliar nutrition designed for broad nutritional support
	BRANDT Smart K B - K and B foliar nutrition for reproductive growth support
	BRANDT Smart B-Mo - B and Mo foliar nutrition for flowering and pod set support
Adjuvants	BRANDT® Uptake® Plus - Utility adjuvant designed to improve herbicide performance and compatibility
	BRANDT® Torpedo® Plus - Drift and deposition adjuvant designed to improve spray coverage and penetration

20 YEARS

VOL. 1, NO.1

mwseeds.com

23 MARCH 2007

BREAKING NEWS

2007: THE BEGINNING

*Average Corn Prices:
\$3.10 a bushel*

*Average Soybean Prices:
\$10.10 a bushel*

*Average Fertilizer Prices:
\$90.00 per acre*

*Average Combine Cost:
\$180,000*

*Average Gross Income:
\$89,000 for a Family Farm*

Things have changed drastically in the last 20 years. The cost of equipment, seed, fertilizer, etc has increased exponentially. And unfortunately the ever growing expenses make it hard for family farms to stay afloat. Which is where we come in. This company was established on a base of supporting our family farmers, by providing a high quality product at a great price. Because we ourselves are family farmers and understand that being a farmer is not just a job. You don't punch in at 8 in the morning and punch out at 4. There are

days more time than not, that you are working from dawn till dusk. It's not a job, it is a way of life. And it is one of the most humbling things, because every year determines the next, and you never know what the year will bring. And our goal, is to be here to help keep those family farms going, so their children and their children's children can continue to pass on their knowledge. Those generations are the future of this company, we will always need farmers.

FARMING IS AN Passing on the knowledge
HONOR is priceless
