M & W SEEDS

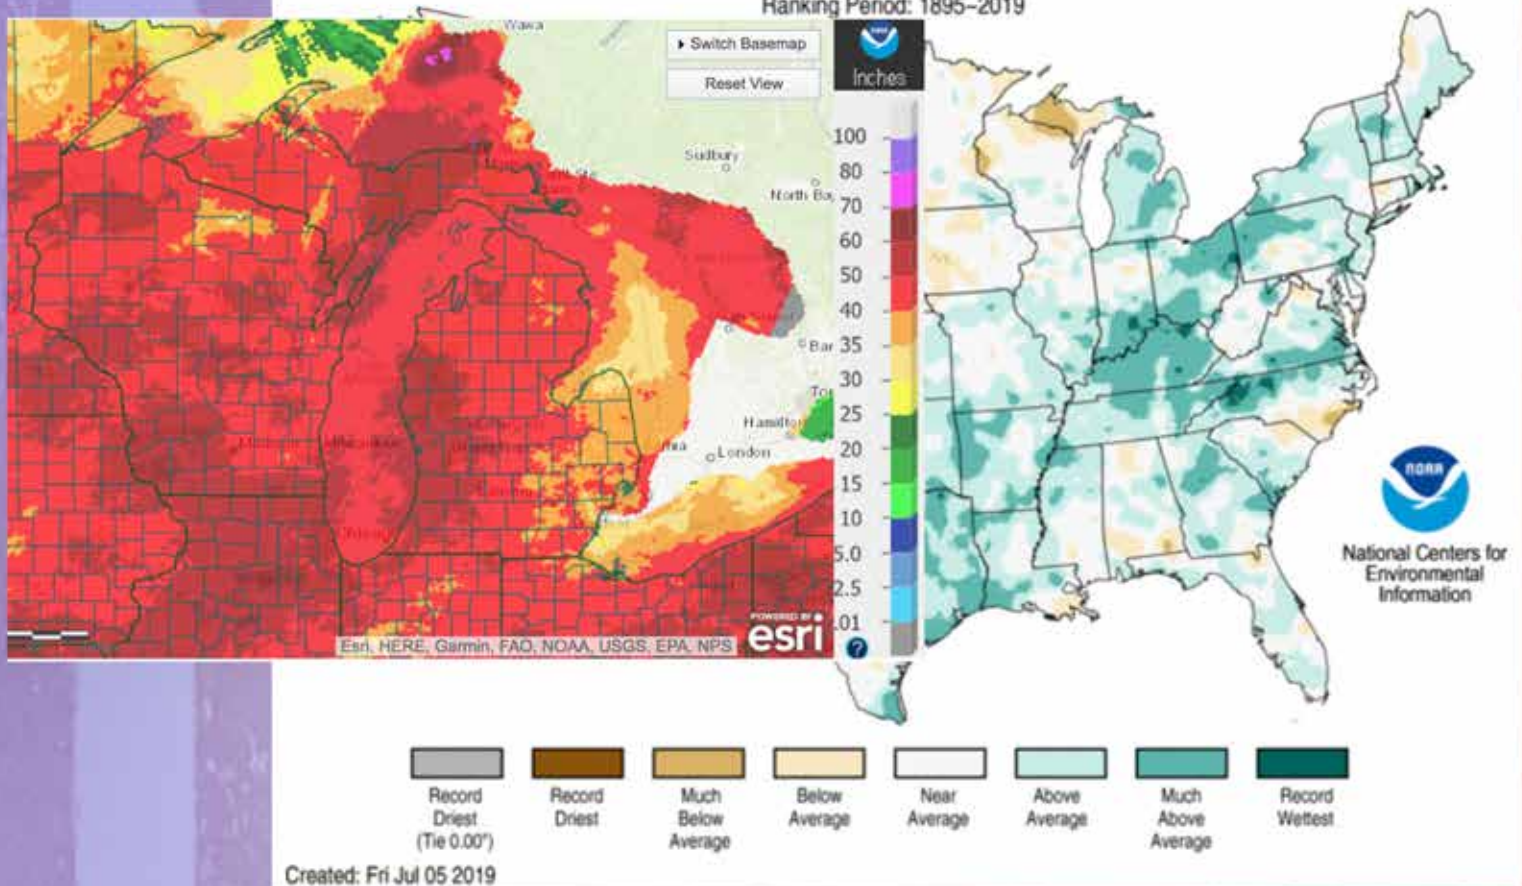

WHAT KIND OF LEGACY
WILL YOU LEAVE?

2021 PRODUCT CATALOG

Total Precipitation Percentiles

June 2019

Ranking Period: 1895-2019

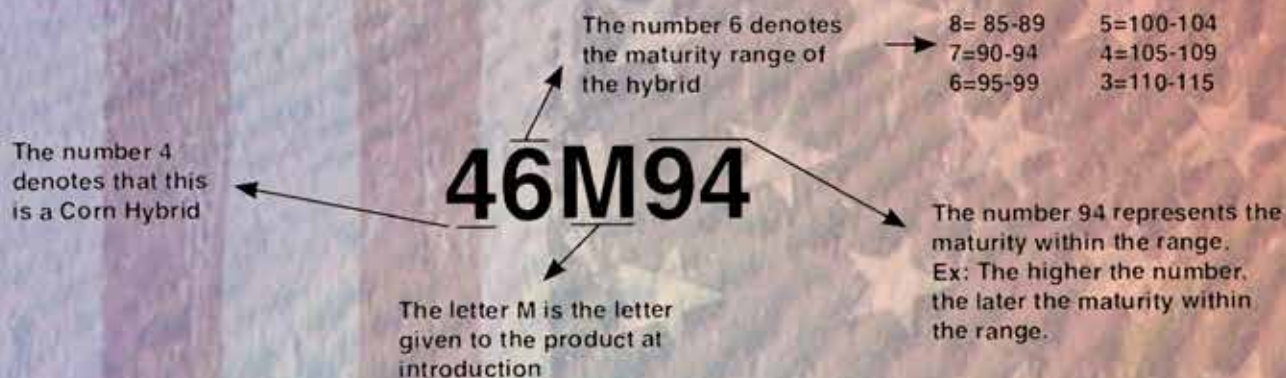

The last several years have brought many hardships to our farming community. Between the unpredictable weather a few years ago, the monsoon-like rains that Michigan and the midwest recieved last year, the replanting those rains caused, and finally top it off with a world-wide pandemic like COVID-19 that severely crushed our markets. Last year we forced seed into wet ground because our growing season was going to be cut short. Most of the early fields that did get planted-if they were planted at all-required replanting which M&W Seeds stood behind 100%. M&W bought back untreated seeds at no cost and offered to store seeds for those customers who did not have storage for their purchased seed. These last few years have shown that none of us can make it on our own. Farmers without a seed company that is willing to help them during challenging times or a seed company with no farmers to service will never last. Bottom line is we need each other. M&W Seeds is only as good as its customers and families that support it. That is our legacy. Helping families, providing them with quality local seed, top notch service, honesty, integrity, and providing knowledge to keep them going. What is your legacy?

UNMASK YOUR YIELD POTENTIAL in 2021 with M&W Seeds.

CORN

M & W Seeds
Numbering System

Product Ratings are based on the average performance of a hybrid grown over a wide range of climates and soil conditions. Extreme conditions may adversely affect the performance of these hybrids.

Product Rating Scale:

9 = Excellent

5 = Average

1 = Poor

Plant Type: T = Tall
Short

MT = Medium Tall

M = Medium

MS = Medium

Ear Type:

F = Flexible

SF = Semi Flexible

SD = Semi Determinate

D= Determinate

SOYBEANS

M & W Seeds
Numbering System

Plant Type: M= Medium Bush, MT = Medium Tall

Phytophthora Root Rot:

Rps 1a = resistant to races 1,2,10,11,13,15-18,24,26,27
Rps 1k = resistant to races 1-11,13-15,17,18,21,22,24,26
Rps 1c = resistant to races 1-3,6-11, 13,15,17,21,23,24,26
Rps 3 = resistant to races 1-5,8,9,11, 13,14,16,18,23,25

Not indicated = No specific resistance

White Mold, Brown Stem Rot, SDS, Emergence, Standability rating scale.
Phytophthora Field Tolerance: 1 = Excellent, 5 = Poor

Flower Color:

W = White

P = Purple

Hilum Color:

Bl = Black

T = Tan

IB = Imperfect Black

Bf = Buff

Pod Color:

T = Tan

Br = Brown

Pubescence: T = Tawny, LT = Light Tawny, G = Gray

Corn Hybrids

Hybrids

Special Traits

Hybrids		Special Traits
48R11	Attractive hybrid that packs a big yield punch in its maturity range. Good early vigor, girthy ear type, and very good stalks. Best suited for the more ideal acre.	   
47T16	Excellent top end yield performance hybrid with the strong emergence and seedling vigor to handle cold soils. Medium statured plant with very good stalk sand roots make this a must have early hybrid. Performs best at moderate to high planting populations.	   
47P61	Girthy semi-flex ear type with good drought tolerance. Very good stalks and roots with very strong emergence and early vigor. This is a great candidate for reduced tillage environments.	   
47J65	Versatile hybrid with very good early vigor and stress tolerance. Consistent ear development, above average test weight and drought tolerance scores. Roundup Ready® version of 47J66.	
47J66	Versatile hybrid with very good early vigor and stress tolerance. Consistent ear development, above average test weight and drought tolerance scores.	   
46R52	A superior yield go anywhere kind of hybrid with a solid trait package. A workhorse with excellent late season stalks and plant health, that has top end potential and dual purpose ability.	 3220 E-Z Refuge*
46L42	Shorter high yielding hybrid with very sound stalks and roots. With very good test weight and drought tolerance this is a must have hybrid for the farm. Roundup Ready® version of 46L41.	
46P76	The total package hybrid with very good stalks and roots. Very good drought tolerance. Will work well in all yield environments. And has a nice semi-flex ear with excellent test weight, and very good greensnap tolerance.	   
46T29	Big, tall, robust hybrid with good stalks and roots. Very good test weight with a solid disease package. Best suited in zone and north.	   
45T56	Impressive yield stability across all yield environments. Medium statured plant height with good late season intactness and tremendous ear girth. Flex ear style lets it adapt well to moderate planting populations. Has a strong response to fungicide applications.	   
45M44	Strong yield potential combined with good stalks and roots. Above average test weight and drought tolerance with excellent staygreen.	   
NEW! 45V21	Excellent emergence and vigor make this a must for early planting and reduce tillage. Combine very good test weight and stalks make this a well-rounded hybrid.	   
NEW! 44V74	Strong emerging hybrid with a solid disease rating. The Agrisure Duracade 5222 E-Z Refuge trait stack gives it the above and below ground protection to give it the edge in all agronomic practices.	 5222 E-Z Refuge*
44P86	A taller hybrid that excels in most soil types and management. Very good stalks and test weight with a semi-determinate ear. Very solid agronomically. This hybrid has the look and yield.	   
NEW! 44V41	This farmer friendly hybrid has excellent test weight. Its stellar stalks and roots give it an attractive fall appearance and intactness with consistent yield performance. Roundup Ready® version of 44V40.	
NEW! 44V42	This farmer friendly hybrid has excellent test weight. Its stellar stalks and roots give it an attractive fall appearance and intactness with consistent yield performance. VT Double PRO® version of 44V41.	   
44R77	Very good roots, nice stalks, and really good early vigor put this hybrid at the top in the yield category. A must have in its maturity range.	   
44D81	Yield! Yield! Yield!... Sums up this show stopper. Good disease package combined with consistent girthy ear size and large, deep kernels make this hybrid a must.	   
NEW! 43V69	The Trecepta® trait package allows this hybrid to be widely positioned east to west with good movement north to south. This hybrid is best suited for the highly productive acre.	   
NEW! 43V43	This hybrid raises the bar for yield potential. A robust stalk and root rating give it an excellent late season appearance with very good test weight. Best positioned on high management acres.

Non Genetically Modified

Corn Hybrids

48R10	Attractive hybrid that packs a big yield punch in its maturity range. Good early vigor, girthy ear type, and very good stalks. Best suited for the more ideal acre.
48R46	Solid early hybrid for the tougher acre. Excellent early plant vigor with above average roots and stalks. Your workhorse at 89 day.
47J64	Versatile hybrid with very good early vigor and stress tolerance. Consistent ear development, above average test weight and drought tolerance scores.
47R22	Agrisure Artisan hybrid with strong stalks and roots, the type of hybrid that will work on a broad range of soil types. Flexy ear type and an excellent choice for dual purpose.
46L41	Shorter high yielding hybrid with very sound stalks and roots. With very good test weight and drought tolerance this is a must have hybrid for the farm.
46T28	Big, tall, robust hybrid with good stalks and roots. Very good test weight with a solid disease package. Best suited in zone and north.
NEW! 45T55	Impressive yield stability across all yield environments. Medium statured plant height with good late season intactness and tremendous ear girth. Flex ear style lets it adapt well to moderate planting populations. Has a strong response to fungicide applications.
45P33	Defensive hybrid with strong yields. Solid and stable across all environments with very good drought tolerance. And a very attractive fall appearance.
45M43	Strong yield potential combined with good stalks and roots. Above average test weight and drought tolerance with excellent staygreen.
45M79	Outstanding yield potential that handles stress and drought conditions very well. Stable performer and excellent standability combined with consistent girthy ear size.
44P85	A taller hybrid that excels in most soil types and management. Very good stalks and test weight with a semi-determinate ear. Very solid agronomically. This hybrid has the look and yield.
44R33	Outstanding top end yield potential with very strong stalks and roots. An impressive disease package that deserves a look on your farm.
NEW! 44V40	This farmer friendly hybrid has excellent test weight. Its stellar stalks and roots give it an attractive fall appearance and intactness with consistent yield performance.

ABOVE GROUND,

With the comprehensive protection provided by Agrisure Viptera® and Agrisure Duracade® trait technology, your yield has a better chance of reaching its full profit potential. Agrisure Viptera defends against insects above ground, while Agrisure Duracade protects against below-ground pests, for protection anywhere you need it. Talk to your local seed reseller about profit protection that goes above and beyond.

IMPORTANT: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

IMPORTANT IRM INFORMATION: See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

More information about Agrisure Duracade® at www.biotradestatus.com.

Agrisure Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, Inc. Herculex® Technology incorporated into these seeds is commercialized under license from Dow AgroSciences LLC. Herculex® and the Herculex® shield are trademarks of Dow AgroSciences LLC. Seed products with the LibertyLink® trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post emergent weed control of Liberty herbicide for optimum yield and excellent weed control. LibertyLink® and the Water Droplet Design® are trademarks of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association.

Before opening a bag of seed, be sure to read seedcare and insecticide stewardship requirements, including applicable usage requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology statement that you sign. By opening and using a bag of seed, you are affirming your obligation to comply with the most recent stewardship requirements.

¹Genuity[®] VT Double PRO[®] RIB Complete[®] is a corn seed blend of 95% Bt seed and 5% non-Bt seed.

²Pioneer claims suppression of corn earworm on the Optimum[®] AcreMax[®] and Herculex[®] 1 labels; Syngenta claims suppression of corn earworm with Bt11.

Before opening a bag of seed, be sure to read, understand and follow the stewardship requirements, including applicable release requirements for insect resistance management. For the full stewardship requirements, visit www.bayer.com or see each of the stewardship agreements that you sign. Be sure to read and follow a bag of seed, you are confirming your ability to comply with the stewardship requirements.

Bayer is a member of Excellence Through Stewardship[®] (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship[®] is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. B.T. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete[®] corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready[®] 2 Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex[®] is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera[®] is a registered trademark of a Syngenta group company. LibertyLink[®] and the Water Droplet Design[®] is a trademark of BASF Corporation. Soybean Varieties

Hybrid

Special Traits

NEW! 20L69	This attractive light tawny/tan variety raises the bar for yield potential. Very good IDC tolerance and above average white mold scores make it a key early line.	LIBERTYLINK[®] GT27
21E26	Early E3 line that has the complete package. From a loaded up disease package to emergence and standability and yield. This variety will cover all the acre types in the early group 2 zone, and move south well.	
23T88	Go anywhere medium tall plant with strong emergence and good standability. Stellar yield potential with a solid agronomic package make this early group 2 a must have on your farm.	LIBERTYLINK[®] GT27
NEW! 25E25	This variety packs a punch. It is an impressive key line with best of class IDC and eye catching yield performance across all regions.	
26T32	Top notch disease package along with solid and stable performance across all acres. Good PRR field tolerance, strong sds ratings bring this variety to the top.	LIBERTYLINK[®] GT27
26M81	Tall rugged variety with outstanding stress tolerance. Very high yield potential combined with powdery mildew resistance makes this variety a must for your farm. This is a landlord pleaser.	GLYPHOSPHATE RESISTANT
28T76	Attractive tawny that will go east to west, and handle stress very well. A key line that raises the yield bar in the late group 2 maturity, along with excellent PRR field tolerance make this a must have GT27.	LIBERTYLINK[®] GT27
29E85	This one tops the charts with impressive field ratings and the yield to back it up. A nice lateral branching medium tall plant with exceptional standability, and excellent PRR field tolerance.	
NEW! 30L10	With a unique look this light tawny/tan is a medium tall variety. It has excellent lodging scores and SDS tolerance. This variety has a wider plant stature to really help fill in the rows.	LIBERTYLINK[®] GT27

Dow AgroSciences is a member of Excellence Through Stewardship® (ETS). Dow AgroSciences products are commercialized in accordance with ETS product launch stewardship guidance and Dow AgroSciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

The Enlist™ System - Get Control of Tough Weeds

- New 2,4-D Choline
- Glyphosate
- Glufosinate

Following burndown, Enlist Duo® and Enlist One® with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3™ soybeans.

- Convenient blend of 2,4-D choline and glyphosate
- Two modes of action to deliver control and help prevent resistance in your fields

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Ability to tank-mix with glufosinate and other qualified herbicides, customizing the ratio of herbicides to match each farm's needs

On-Target Applications

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

We at M&W Seeds are committed to the success of our customers and their families. We view them as partners in our business, for as their business grows so does ours. We continue to focus heavily on products for their geographical areas that deliver the best value for their operation. Unlike some of the major brands, our customers dictate the trait packages that we deliver to them. We feel our customers are our greatest asset and we will continue to move forward in a way that insures their family's long term success.

What is legacy? Legacy bears strong meaning rooted deeply in the soil we farm. It is the generous gift of bountiful land, countless opportunities, and the creation of a bright future for generations to come.

Legacy is a daily reminder of past, present, and future success.

Our legacy is a company that is not only a part of your operation, but also one that is a part of your community. A company where your voice is heard, your ideas and concerns are integrated into our daily operations. A company that our customers are proud to call their own! So as you sit down to evaluate your operation and decide what seeds to purchase, what chemicals to buy, and how much fertilizer to apply. I challenge each of you with a simple question...

WHAT KIND OF LEGACY WILL YOU LEAVE?

WHAT KIND OF LEGACY
WILL YOU LEAVE?

UNMASK YOUR YIELD POTENTIAL!
