

## Air Conditioning Instructions

It can get hot in Lanzarote, so we've installed individual Air Conditioning units in each bedroom for your comfort.

The Air Conditioning is coin-operated. Please insert coins (1€ / 2€) into the Air Conditioning activation box on the far wall in the Utility room. This will top-up the credit, which will be displayed on the box.

### Operating the Air Conditioning

There are remote controls within each bedroom. Please point the remote control at the Air Conditioning unit and click to switch it on. Fan speed and temperature can be controlled using the remote control.

### Tip: don't leave the Air Conditioning running when you aren't in

It is often tempting to leave the Air Conditioning on while you're out, so the rooms are nice and cool. Please try to avoid this temptation.

Firstly, it isn't needed. The way Air Conditioning works, the room will cool within a matter of minutes and this will be no different to leaving it running for hours.

Secondly, it will add a lot unnecessary cost to you.s
