

Bathroom Information and Requests

The Bathrooms are designed to be spacious and airy. The showers run from the main water tank.

Just a couple of tips and requests:

Hot Water

The hot water can take a while to kick-in, so please don't worry if you are waiting a few minutes before it gets warm.

A tip is to put the shower onto full heat (standing well clear for safety), as this speeds everything up and gets hot quickly. Then reduce the temperature down as required. This is faster than setting on a lower temperature and waiting. Please take great care though in doing this and supervise children for safety.

Toilet flushing

Please don't flush anything other than toilet paper down the toilets. The sewage system in Lanzarote cannot cope with anything else, and blockages will occur. Call-out charges will unfortunately need to be passed on for blockages caused by items flushed down the toilets.

Please use bins provided to discard of all any other items including sanitary products.

Towels

Towels are provided and will be available in the Villa on your arrival. Please do not take any of our towels away from the Villa. Please use your own towels for use on the Beach etc.

Ventilation request

After using the Bath or showers, please open the bathroom doors (and window in the case of the family bathroom to the right of the villa with the walk-in shower) to help with ventilation. This will be much appreciated in helping to avoid too much condensation.

Please ensure external windows are closed and locked before exiting the villa.
