

Driveway and Electric Gate Instructions

The Electric Gate works with a remote-control fob that should be left in the kitchen. Click the button once to open the gate. Click the button again to close the gate.

Upon your arrival, it is highly likely the Gate will be closed. Please initially park on the street and pick-up the fob from the Villa to then open and access the driveway.

There is plenty of space to park a large family car on the driveway. There is additional space to store bicycles etc.

When leaving Villa Rossa, please ensure the close is closed fully. If for any reason the fob is not working, please contact +34 928 519 719 or +24 670 690 294.

Safety

Please supervise children at all times in the driveway area and when opening or closing the gate. We have added safety precautions to the gate, but it is imperative that you exercise caution at all times to avoid injury.
