*The ring that connects  
experience with innovation*

---

# MI — SSI — ON —

*Flexibility, speed and quality.  
We are ready to satisfy  
all your requests.  
Meeting your needs  
is our mission.*

We establish relationships of trust with each customer because we believe in strong relations projected into the future. We grow with you and come to visit you in person to search for the best solution together. Our goal is to satisfy your technical and commercial needs promptly, offering high quality and supplying top class materials with maximum safety.

# PHI \_\_\_\_\_ LOSO \_\_\_\_\_ PHY \_\_\_\_\_

*Every day we grow  
thanks to the products  
developed especially for you.*

We offer you our know-how, through a streamlined and dynamic corporate structure, providing you not only with top quality products but also with a commercial and after-sales service that is optimised to suit your needs.

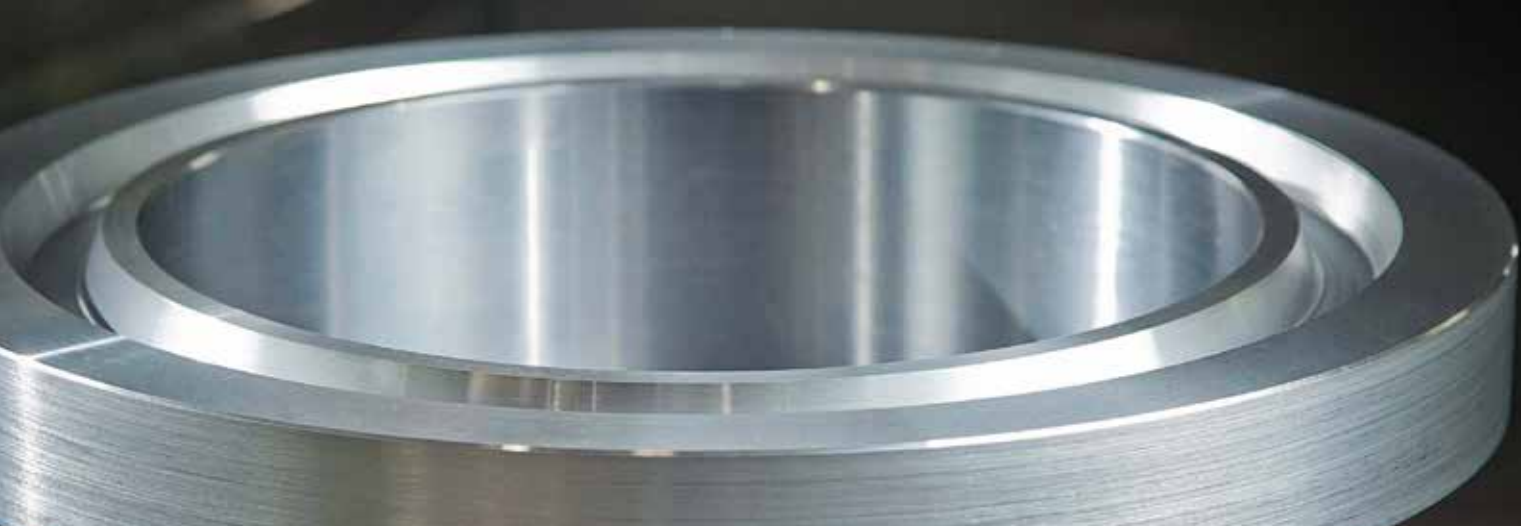

# PRO DU CTS

*What you need,  
just as you need it.*

We are specialized in the production of seamless rolled rings, provided with a rectangular section or shaped according to your design, as well as in the manufacturing of flanges, forged discs and other details of open-die forgings.

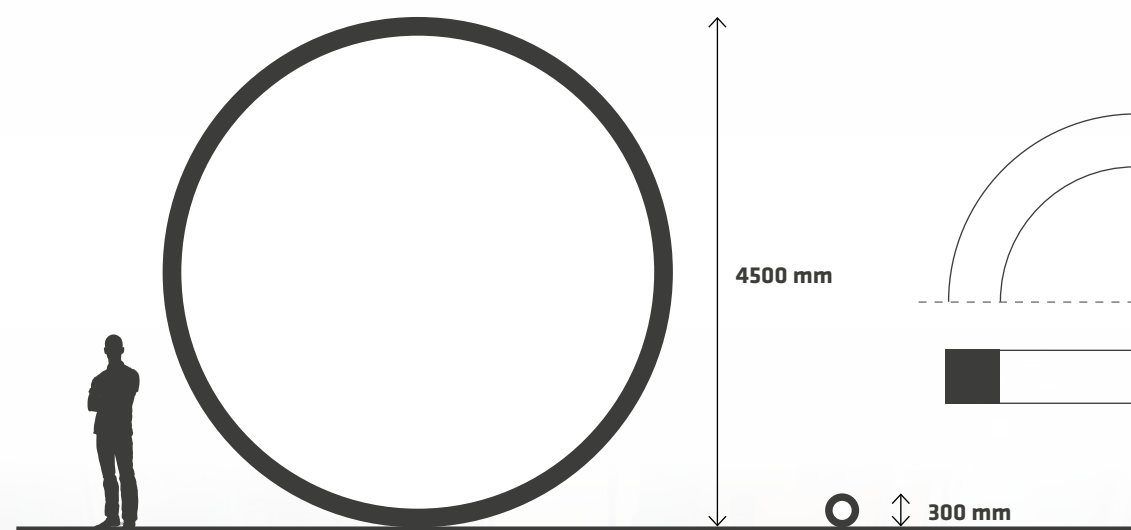

## SEAMLESS ROLLED RINGS

Seamless rolled rings and flanges with a rectangular section or shaped:

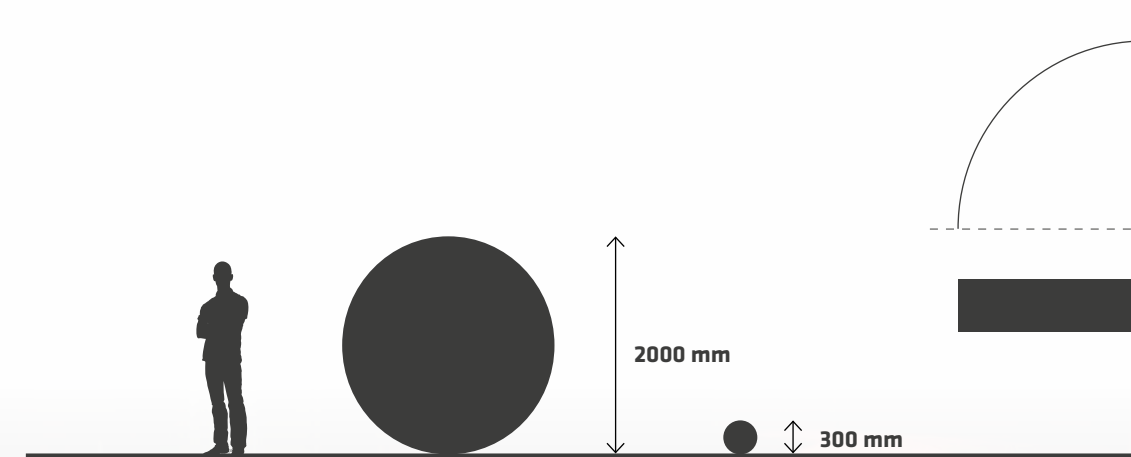

- Min. external diameter > ca. **300 mm**
- Max. external diameter > ca. **4,500 mm**
- Minimum weight > ca. **100 kg**
- Maximum weight > ca. **12 tonnes**

## OPEN-DIE FORGINGS

Discs, moulds and other details of open-die forgings:

- Min. external diameter > ca. **300 mm**
- Max. external diameter > ca. **2,000 mm**
- Minimum weight > ca. **300 kg**
- Maximum weight > ca. **12 tonnes**

---

## PROCESSED MATERIALS

---

*We guarantee maximum quality  
of all materials.*

- CARBON STEEL
- LOW ALLOY
- ALLOY
- STAINLESS STEEL
- DUPLEX
- SUPERDUPLEX
- SPECIAL NICKEL ALLOY

All parts are supplied in accordance with  
the regulations of each material and your  
specifications, either rough, rough-machined  
or finished through mechanical machining.

---

## OUR MACHINES

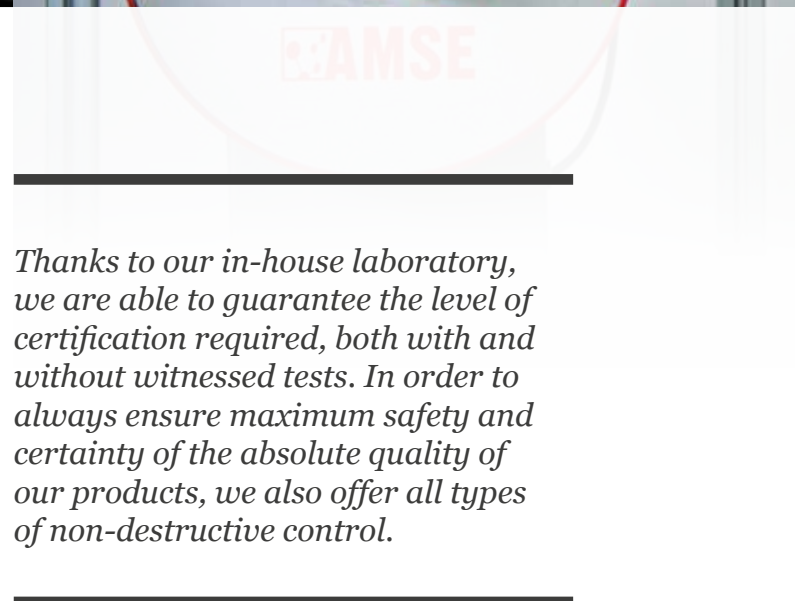

---

*The high level of competitiveness  
of our products in international  
markets is ensured by a system  
of installations that is constantly  
updated in order to meet the most  
specific and complex requirements.*

- A 2,500-TONNE PRESS
- 1 ROLLING MILL
- 4 HACKSAWS
- 4 HEATING FURNACES
- 2 HEAT TREATMENT FURNACES
- 2 TANKS FOR HEAT TREATMENT  
WITH WATER AND POLYMER
- 9 VERTICAL LATHES
- 2 VERTICAL DRILLING MACHINES
- 1 BORING MACHINE
- 1 CASER MACHINING CENTRE
- 1 DRILL PRESS

*Thanks to our in-house laboratory, we are able to guarantee the level of certification required, both with and without witnessed tests. In order to always ensure maximum safety and certainty of the absolute quality of our products, we also offer all types of non-destructive control.*

*Unrivalled experience.*

Our experience is constantly enriched by our daily commitment in several different and important fields of application on a global scale.

- ISO 9001
- 97/23/CE (PED)
- DNV PRODUCT CERTIFICATION  
FOR THE PRODUCTION OF FORGINGS
- GERMANISCHER LLOYD'S PRODUCT  
CERTIFICATION FOR THE PRODUCTION  
OF FORGINGS
- AD 2000-MERKBLATT WO
