

Syngonium wendlandii

Velvet Arrowhead plant

DESCRIPTION

An eye-catching trailing plant with velvet green leaves and striking white midvein could be an ideal choice for the hanging basket and a tiny ecosystem. To maintain its vivid colour, place this lush plant in a semi-shade spot with bright light. Direct sun exposure will scorch the leaves. When it comes to soil requirement, you can add four-part of peat and one part perlite or sand in a pot with a drainage hole to keep the plant's root healthy and avoid being saturated which results in root rot .

CARE

Uses: Indoor plant, potted display, hanging basket, terrarium

Light: Semi-shade, bright light

Humidity: > 80%,

Water: limit watering during winter, keep the soil moist in the growing season but not saturated

Common Issue: Thrips will cause yellow spots on leaves, infested leaves by Aphid becomes distorted and yellow, root rot due to overwatering, mealybug

Toxicity: Toxic

Syngonium Pixie

DESCRIPTION

One of the most popular Syngonium varieties with a dwarf and more compact habit which makes it a wonderful feature for a terrarium. Its attractive foliage with a dark green edge and creamy white in the middle create gorgeous contrast with other indoor collections. A regular mist provides a constant humid environment which helps Syngonium to stay happy and healthy. Avoid too much watering that causes root rot and yellowing leaves. Like other varieties, allow the top soil dry between watering.

Photo: Terrariums By Ella

CARE

- Uses:** Tabletop, container garden, terrarium
- Light:** Bright and indirect light
- Humidity:** Regular mist to provide constant humidity
- Water:** Avoid too much watering, allow topsoil to dry
- Common Issue:** Lack of enough light causes the leaves to lose variegation
- Toxicity:** Toxic

Syngonium Golden Allusion

DESCRIPTION

Brighten up your miniature forest or lounge room by adding Syngonium Golden Allusion to your collection. This fast grower and easy-care arrowhead plant have striking lime green borders with slight reddish-pink veining which give an attractive contrast with other varieties. Their trailing habit makes IT an ideal choice for hanging baskets. They have the tendency to become leggy, so it is good to pinch the node to reshape it, however, if you prefer hanging vines, avoid trimming and just pinch the old leaves.

CARE

Uses Indoor plant, potted display, hanging basket, terrarium

Light: Bright and indirect light

Humidity: Likes a warm and humid environment

Water: Keep the soil moist but let the topsoil gets dry before watering

Common Issue: Mealybugs, the leaves may lose their lime hue in low light

Toxicity: Toxic

Syngonium Neon-pink arrowhead plant

DESCRIPTION

Green with a bit of lipstick! Syngonium Neon 'Pink Arrowhead Plant' with arrow-shaped leaves turn to peachy pink when the plant matures. Because of its beautiful pink colour, creates a striking contrast when shows up next to other varieties in your room, office or miniature forest. Like other Syngonium varieties, loves humidity, so regular misting keep it healthy all the time. This beauty begins growing densely but slightly spreads out and cascades down from the pot as matures. A trimming back will make it a tidy with a bushy appearance.

CARE

Uses Indoor plant, potted display, hanging basket, terrarium

Light: Shady spot with indirect sunlight

Humidity: A regular misting keep it healthy

Water: Keep the soil moist but let the topsoil gets dry before watering

Common Issue: direct sunlight can burn the foliage

Toxicity: Toxic

Syngonium podophyllum 'Dwarf Princess' -

DESCRIPTION

A real stunner with splashes of green and pink on the leaf catering a pinkish theme to your interior design. This beauty has a vining habit so is ideal for a hanging basket. This beauty likes a warm and humid environment with bright but indirect light which makes it ideal for a terrarium. When the plant matures, it grows wildly and becomes a bit leggy so little trimming can help to shape it nice and tidy.

CARE

Uses: Potted display, hanging basket, terrarium

Light: Bright and indirect light

Humidity: Likes warm and humid environment

Water: once a week in winter, needs well-drained soil

Common Issue: Yellowing leaves due to poor lighting, improper soil moisture, or when the leaves get old

Toxicity: Toxic

Syngonium 'Pink Heart'

Cream Alusion

DESCRIPTION

Syngonium pink heart is an elegant indoor plant with compact habit. The heart-shaped leaves are creamy-green with a dark green edge and pink veins in the centre adding a stunning feature in a mixed container in your shady balcony. Keep the soil moist but not saturated, which leads to root rot and fungus issue. To keep it bushy in appearance and prevent the stems from growing too long and leggy, pinch and prune out the old stems regularly.

CARE

Uses: container, potted display, terrarium

Light: Provide bright and indirect light to prevent the leaves from being scorched

Humidity: Likes warm and humid environment, keep them away from dry air from the heating system

Water: Once a week in winter, needs well-drained soil, allow topsoil dry between watering

Common Issue: Yellowing leaves due to poor lighting, improper soil moisture, or when the leaves get old

Toxicity: Toxic

Syngonium Elf

DESCRIPTION

An attractive clumping Syngonium for a shady spot!

Syngonium podophyllum Elf, with striking arrow-shaped leaves which are green on the edge and white-green in the centre, can offer wonderful contrast in your mini ecosystem or mixed container. Occasional pruning helps it stay outstanding.

They are ideal for the hanging baskets in your patio, shady spot outdoors and could be a striking centrepiece in mixed containers.

CARE

Uses: Hanging basket, terrarium

Light: Bright and indirect light

Humidity: Likes warm and humid environment

Water: let the topsoil gets dry, needs more water in the growing season

Common Issue: Yellowing leaves due to poor lighting, or improper soil moisture

Toxicity: Toxic

Syngonium Silver Pearl

DESCRIPTION

A decorative arrowhead plant with silvery foliage and a touch of the green border. Young leaves are heart-shaped, then become arrowhead shaped as the plant matures. Syngonium Silver Pearl is sensitive to hot or cool airflow from air-conditioning or the heater. So place this beauty in a sheltered area with a warm and humid environment. As a tropical trailing plant, it is an ideal choice for hanging baskets. Like other varieties, may need occasional pruning to avoid the plant looking leggy. Due to its light and silvery leaves, looks wonderful in combination with plants with dark green foliage such as Epipremnum jade 'Pothos green' or Philodendron heart leaf making a mesmerizing contrast.

CARE

Uses Hanging basket, terrarium

Light: Bright and indirect light

Humidity: Likes warm and humid environment

Water: Allow the topsoil to dry between watering, regular spritzing makes the plant look healthy

Common Issue: Yellowing lower leaves due to overwatering, sensitive to forest

Toxicity: Toxic

Syngonium Snow White

DESCRIPTION

A compact and upright variety of Syngonium with heart-shaped leaves is an ideal houseplant for decorative pots. It is an easy-growing indoor plant that loves shady spots with indirect light. When the plant matures you may need to tidy it up by removing the old leaves and keep its compact shape.

CARE

Uses: container garden, terrarium

Light: Bright and indirect light

Humidity: Regular mist to provide humidity

Water: Allow topsoil to dry between watering

Common Issue: Root rot due to overwatering

Toxicity: Toxic
