

400 BBL STORAGE TANKS

TECHNICAL SPEC SHEET

Burj Resources provides heavy-duty 400 BBL vertical tanks engineered for fluid storage in a wide range of field conditions—from single-well programs to large tank farms. These tanks are designed for safe, efficient handling of fluids, even in extreme temperatures.

Key Features

- Available in insulated and standard configurations
- Sloped bottom with steam coil for effective fluid drainage
- Electric heater options for freeze protection
- External gauge for easy fluid level visibility
- Multiple 4" valves with secure fittings, plus dedicated 3" fill line
- Integrated fall arrest system (CSA compliant)

Add-ons & Options

- Agitator/gun lines for fluid circulation
- Electric heating elements with thermostat controls
- Lined tank options for added fluid compatibility

With a compact vertical footprint, our tanks maximize site space while delivering dependable performance. Burj Resources also offers full support with logistics, setup, and decommissioning as needed.
