Liberty Hill Precision Firearms

Carbon Ultra-Long Range Predator “Gen-II”

Base Price: \$5,900

Engineered for a purpose – Born just BADASS! Designed for 500 to 1,500 yard out of the box capability. Calibers from 6.5mm to .458 Calibers. Engineered in our Private Production Facility, this rifle is not for the faint of heart in purpose or in the pocketbook... This is an expensive weapon, but “expensive” is just relative, it is not about cost, it is about delivery of performance and quality. Quality is never compromised in this build. Extreme distance engineered, we chamber in many calibers but specialize in the 6.5mm to 338 Calibers for extreme duty professional-duty and professional-grade work. Available in Left Hand and Ambi-Tactical Switch-Barrel Solutions.

Shooting beyond 2,000 yards? You need our .338 or .375 Calibers in our most wicked wildcat calibers ever...

Carbon Ultra-Long Range Predator “Gen-II” **Purpose-built and Purpose-Engineered**

The Carbon Ultra Long Range Predator Gen-II is a caliber specific “Purpose-engineered” build. You just let us know what you need to accomplish, we engineer it to perfection. Engineered in ultra-hyper velocity rounds from 6.5mm x 300 RUM, 7mm RUM, 300 RUM, 338 RUM, 338 Lapua Magnum. These weapons are designed to absolutely dominate the range, the game or whatever your quarry. Engineered for extreme ranges under any conditions. Hart match grade barrels between 25” - 28”, extreme deep fluted barrel with 5/8”x24 TPI threading, or your choice of a Carbon Fiber Barrel for a extreme weight reduction. Aluminum and Carbon Fiber Chassis (standard in this build). Custom Titanium Picatinny Rail Systems from one to quad are available. Built exclusively on the proven Remington 700 Long Action, Surgeon or Deviant Actions. Shilen, Timney Calvin Elite or Jewell Triggers. Sako bolt extractor, bolt fluting, bolt skeletonization and custom bolt knobs ensure a positive never-fail to feed or extract even the most potent calibers or load combinations. One-piece Stainless or Titanium bases are standard on these builds as are titanium rings necessary to support the high-end optics such as Schmidt-Bender Police/Tactical options and other extreme adaptive optics systems necessary to ensure you remain the predator and never the prey in any situation. The Carbon Ultra-LR Predator Gen-II is a refined 2019 Model of the proven Predator X2.

Features

Match-grade premium barrels in SENDERO, Magnum CF Heavy or M24 Contour – Threaded and Non-Threaded

USMC AWP 40x Sniper Elite

Base Price: \$6,500

USMC Modern 40X Sniper Elite, Advanced Weapons Platform

Engineered for one purpose – built as the “new” Modern 40X USMC Sniper Rifle based on the 40X Vietnam design. Caliber specific engineering converging US and Russian Technologies in a highly advanced weapons platform from NATO to Russian Elite Sniper Calibers in Short and Long Action Caliber offerings... One really BADASS 40X Remmy!

Built in 6.5 Creedmoor, 7.62 NATO, .308 Win. and Russian 7.62x54R M1A1 or M1A2 in LA Magnum Calibers

USMC AWP 40X Sniper Elite

Purpose built by Elite Snipers...

Short Action build based on the REM 700 SA or REM 40X blueprinted Action, we designed this rifle to have all the accuracy traits, functionality, balance and performance known all too well with the original M40A1 Vietnam Rifle built in the traditional 7.62x51 NATO (.308 Win.) caliber. However we also offer this design in the deep penetrating and ballistic coefficient superior 6.5mm calibers or the popular Russian variant, The 7.62x54R caliber in .308 bore as the 7.62x53 or the 7.82mmx54 (.308 bore specifically for this caliber), vs. .311 bore. This design incorporates a carbon fiber MCS Stock, Hart match grade barrel at 24" with a 5/8"x24 TPI threaded barrel for immediate installation of AAC compliant brakes and suppression systems. Built primarily on the proven Remington Short Action Model 700 or REM 40X Action, these actions are finished with match grade bolt firing pin, spring, beefed up extractor, bolt fluting, skeletonization and custom bolt knobs that will not fail under the most demanding of situations or environments. A 20 MOA One-piece Titanium base is standard on these builds as are titanium ring sets ensuring the highest level of optics support for the most demanding of optics you choose for this weapon.

Features

Match-grade premium Hart barrel in SENDERO Contour – Threaded and Non-Threaded
Hand-laid, custom-finished and carbon fiber bedded McMillian or Manners Stock Configuration
Right handed Action – Blueprinted REM 700 Short Action or REM 40X - or Long Action REM 700
Timney Calvin Elite Triggers available 9oz. – 2.5 lbs. (other weights available upon special request)
Pachmayr® recoil pad standard
Range Validated for “out-of-box” performance at the Point of Impact (POI) you specify
½ MOA accuracy guarantee (all calibers) - wildcat calibers available upon special request

USMC AWP 40X Sniper Detailed Functionality Specifications

Extreme Lightweight Western Hunter

KUIU VIAS Carbon Long Range Hunter

Base Price: \$5,700

Built by our Western Customers -- *"Ounces are Pounds & Pounds are Pain"*

When weight matters you need this weapons platform, available in two versions from 7.5 lbs. to 5.5 lbs. – Designed by our most valuable Western Hunters in Oregon, Washington, California, Nevada, Montana, Utah and New Mexico...

KUIU VIAS Carbon Long Range Hunter

Purpose built by our Western Customer-Hunters

When hunting high altitudes out west, every pound matters. I grew up hunting the cascade and rocky mountain ranges, so I know the value of traveling light when packing in deep... That is where you will find the big Elk and the monster Mule Deer. Demands of the hunter are travel light and hit heavy sometimes at great distances. The KUIU Carbon LR Hunter is our lightest precision hunting weapons platform. The KUIU Carbon LR Hunter was designed specifically to meet the challenges of hunting big game in the high country. Reduced weight, coupled with the ultra durability of manners Elite hunter stocks and extreme long-range accuracy that hunting in extreme environments demands. This is the pack-friendly rifle designed for the hard-core deep pack-in hunter who knows where the BIG ones are. The KUIU VIAS Carbon LR Hunter comes standard with a Remington BDL style magazine (hinged floorplate) to reduce foot print, and ensure a Drop Box Magazine (DBM) is not lost in the harsh environments and pack-in style of hunting required of this type of hunting. Our KUIU VIAS Carbon LR Hunter rifles are available in a variety of actions, calibers, barrel types and lengths.

Features

Match-grade barrels in light-weight contours available in Stainless, Moly or Carbon Fiber Wrapped barrels
Individually hand-laid, custom-finished carbon fiber Manners Elite Hunter Stocks, McMillan or any other stock preference of the customer
Right or left-handed Actions – Blueprinted REM 700 SA/LA - Surgeon – Stiller – Deviant
Extreme-accuracy bedding hand laid carbon fiber
Jewell , Shilen, Timney, or Timney Calvin Elite Triggers available 4oz. To 3 lbs (other weights available)
Pachmayr® recoil pad
Range Validated for “out-of-box” performance at the Point of Impact (POI) you specify
½ MOA accuracy guarantee (all selected calibers from 6.5mm to 338 calibers), wildcat calibers available

KUIU VIAS Carbon Long Range Hunter

Detailed Functionality Specifications

WEIGHT	5.2 lbs to 6lbs 14oz.

High-Energy Transfer H.E.T. Long Range Hunter

H.E.T. 338-340 Long Range Elite Hunter
Base Price: \$7,700

Badass DNA from our Elite Tactical Rifles -- *"DNA of our Police, LEO, Military Weaponry"* -- When a 338 Lapua is just not enough and a .375, .416 or .458 just does not have the ballistics advantage you need then this is what matters to you. Pure unadulterated Power and Accuracy. PERIOD! The ultimate in a long range off-hand hunting rifle.

Liberty Hill Precision Firearms

High-Energy Transfer H.E.T. Long Range Hunter

Liberty Hill Precision Firearms

High-Energy Transfer H.E.T. Advanced Triggers & Firing Solutions...

H.E.T. 338-340 Long Range Elite Purpose built for Extreme Delivery of Energy & Accuracy

When hunting at extreme distance and that shot has to count... That is also where you will find the big Elk, the monster Mule Deer, Bear and African Plains Game at long distances. Demands of the hunter are to travel light and hit heavy sometimes at great distances. The very same DNA in our Police, Military and Elite Sniper Weapons are infused in this hunting platform technology of our H.E.T. Signature-Series builds. There are none more accurate pound for pound and we offer Moly, Stainless Steel and Carbon Fiber Barrels for all types of hunting environments.

Our High-Energy Transfer (H.E.T.) weapon is our highest precision hunting weapons platform. Designed specifically to meet the challenges of hunting big game in the high country or in Africa, our accuracy and hard hitting 338 is capable of extreme distance shots with ethical Killing energy well past 1,200 yards. Extreme long-range accuracy that hunting in extreme environments demands. Comes standard with a Remington BDL style Drop Box Magazine (DBM). All our H.E.T.
