

NEOCAN

S-TYPE LED STRIPS

No light spot | no shadow
bending resistance | high brightness

Convenient, safe, flexible cutting and arbitrary bending

High quality light source

Convenient and safe / longer life / efficient heat dissipation

Long life

Highlight

Power saving

Low flash frequency

USE 2835 LAMP BEADS

Excellent chip bright lamp beads

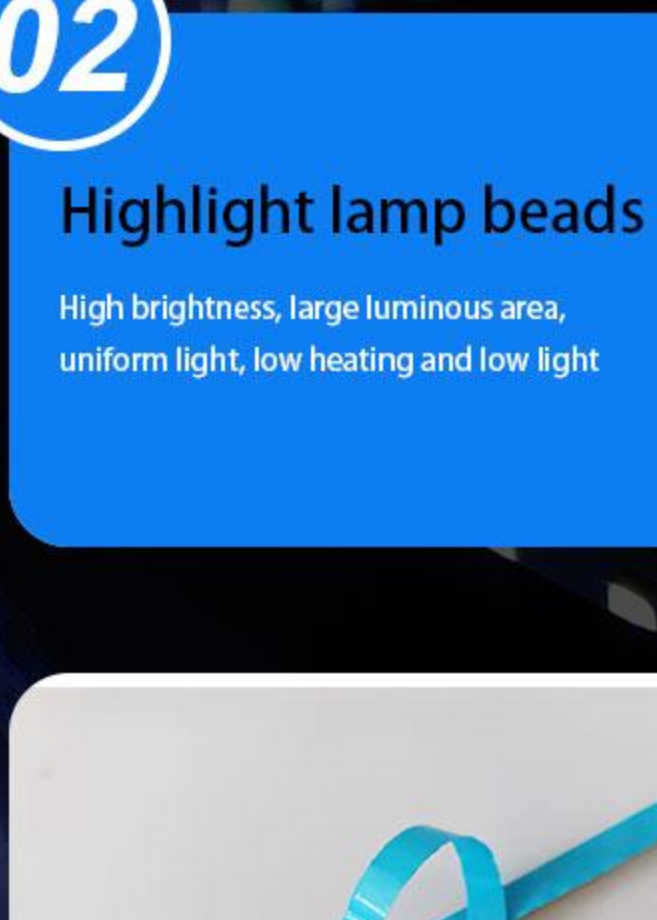

Product details

Details determine success or failure

01

Flexible cutting

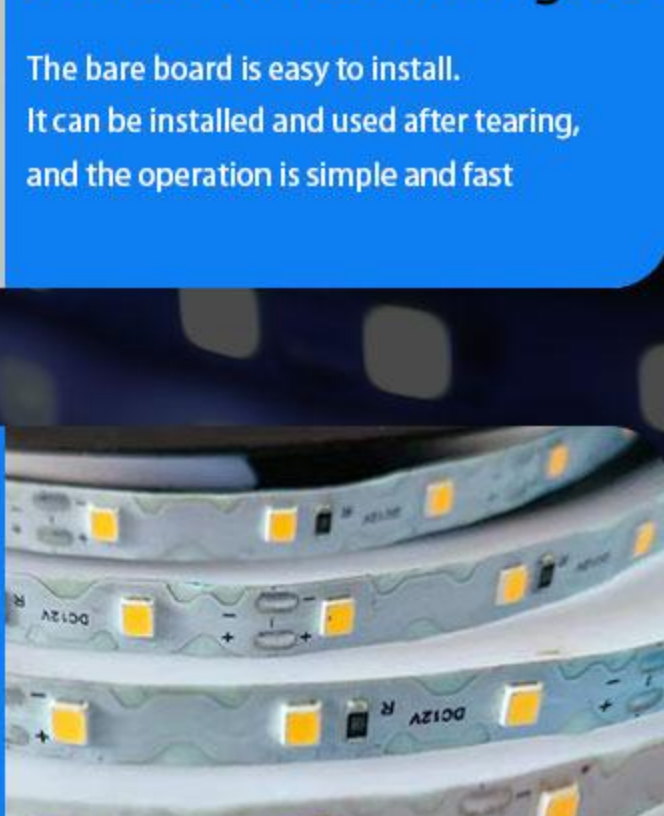

Cut every one lights, which is flexible and easy to meet the needs of different scenes

02

Highlight lamp beads

High brightness, large luminous area, uniform light, low heating and low light

03

Self contained back glue

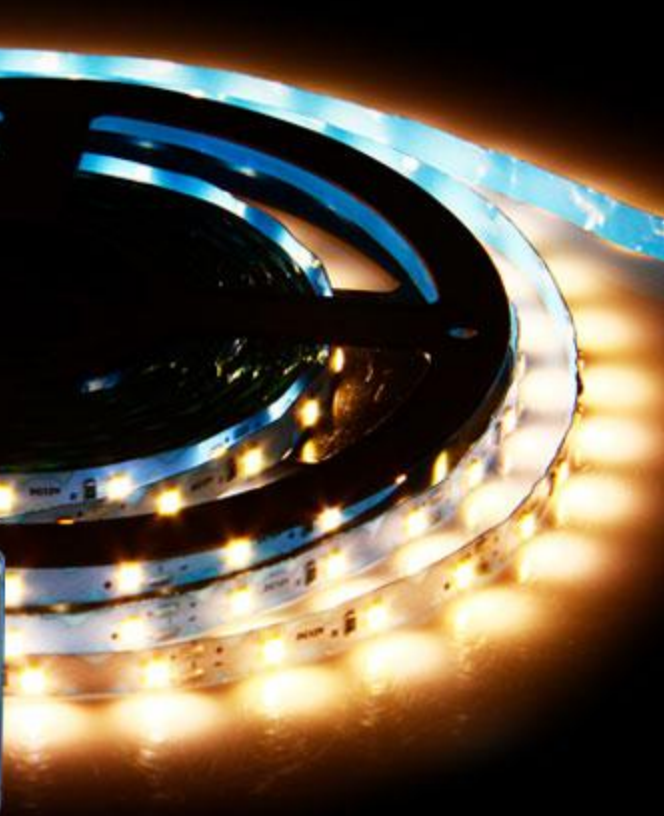

The bare board is easy to install. It can be installed and used after tearing, and the operation is simple and fast

04

Resistance lateral arrangement

More stable current, safer use, no damage to the circuit board when bending

05

IP65 grade/ waterproof

Environmental protection and waterproof, PVC flame retardant material, soft and waterproof

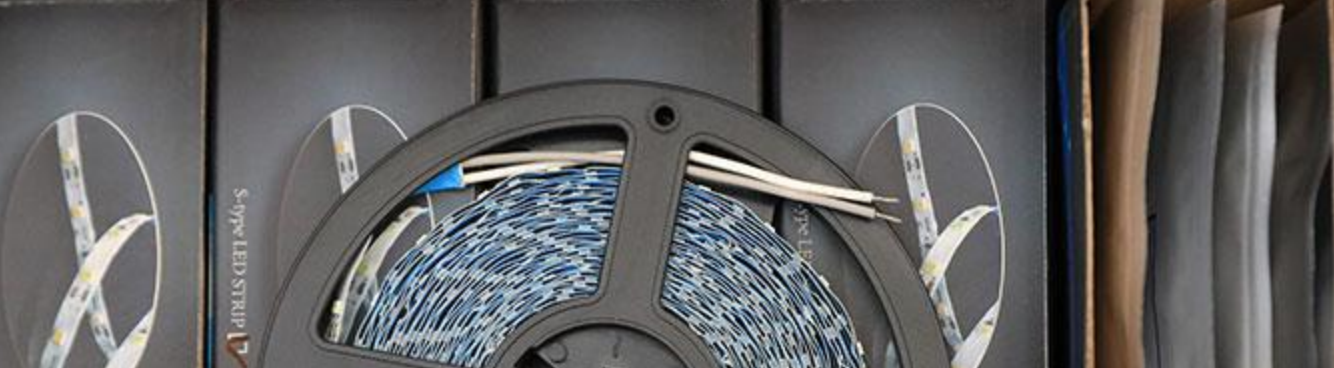

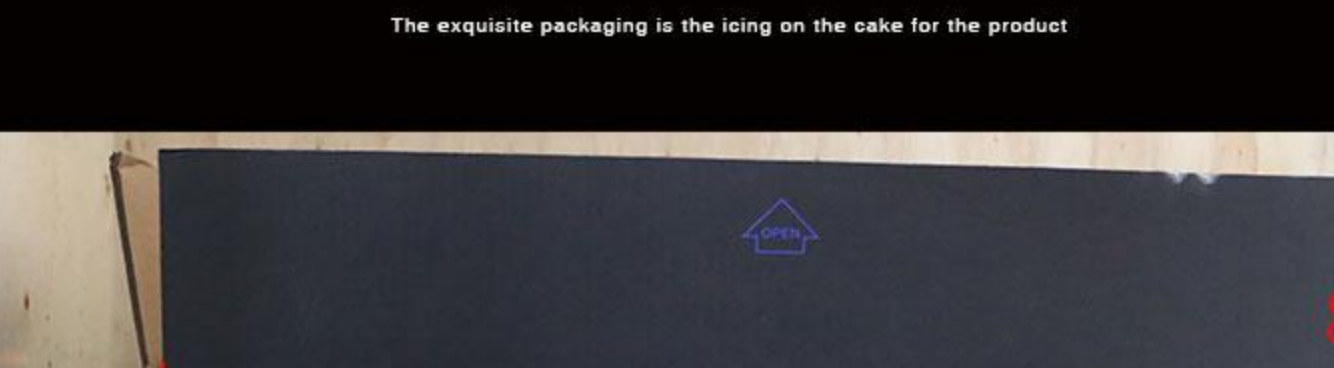

Uniform luminescence

Low power consumption, high light energy conversion, improve brightness

Variety of colors

Full range of colors

Product packaging

The exquisite packaging is the icing on the cake for the product

1 roll	10m
Small Box	5 rolls
Small box size	20cm*20cm*6cm
Big box	100rolls
Big box size	63cm*22cm*42cm

Installation effect drawing

It can be hidden in the ceiling, wall or ground, etc
