Capability Statement

Select Past Performance Projects & Results

- Project: Designed and implemented enterprise email solutions and reporting tools for 1.4 million Department of the Army and civilian users.
- Results:
 - Migrated 1.4 million users' data (100% of Army and civilian users).
 - Maintained 100% data integrity for 1.4 million users.
 - The email migration and reporting solutions resulted in no data loss for 1.4 million Army and civilian users (accounts migrated to centralized enterprise email services for increased security, effective, and efficient management).
 - Appointed as the Trusted Agent to Fortune 500 companies for the Department of the Army.
 - Security requirements for contracts were completed.

- Project: Developed and implemented network architecture and enterprise service solutions for CENTRIX network in Southeast Asia for 4 regions. (CLASSIFIED)
- Results:
 - Implemented solutions for 100% network asset and enterprise service management. Enterprise services were centrally managed and security baselines were implemented for network architecture. Solutions increased 85% productivity and reduced 60% helpdesk tickets.
 - Security consulting and implementation requirements were completed.

- Project: Implemented Information Security Program (risk assessments, security baselines) for State of Texas.
- Results:
 - Implemented information security policies and information security user training programs for the State of Texas.
 - Implemented audit requirement solutions for the State of Texas. Information security solutions met compliance requirements for the Texas State Auditor's Office.
 - Texas State Auditor's Office security requirements were compliant and completed.
