artwork specifications

BLEED

Please ensure 3mm bleed is added to finished size all around document, with 4mm internal bleed. On all critical elements including borders.

COLOURS

Ensure colours are CMYK. PMS and RGB colours are automatically converted and will generally produce undesirable results. Only use PMS colours if they are intended to be printed as such. If artwork is not set to CMYK, we do not take responsibility for the outcome of printed colours.

COLOUR MATCHING

This is not offered as part of our standard service but is something we will work with you to have the best outcome. Variations in print runs can be due to atmospheric conditions and varying stock properties.

For colour critical jobs, a hard copy sample must be provided prior to printing.

INK COVER

Please be aware of the total ink cover you intend using in your design. Heavy ink coverage will reduce turn around time as the job will need to cure prior to trimming.

TEXT

Please convert text to outlines, curves of paths where possible.

WATERMARKS

Watermarks or images used to similar purposes, should not be set at less than 5% ink coverage.
