

## CIRCULOIL'S VALUE SCORECARD

25 vehicle fleet

400 litres of oil recycled

258.8 kg of CO2 saved: equivalent of 12 trees

26.4 days of downtime saved

£3500 saving

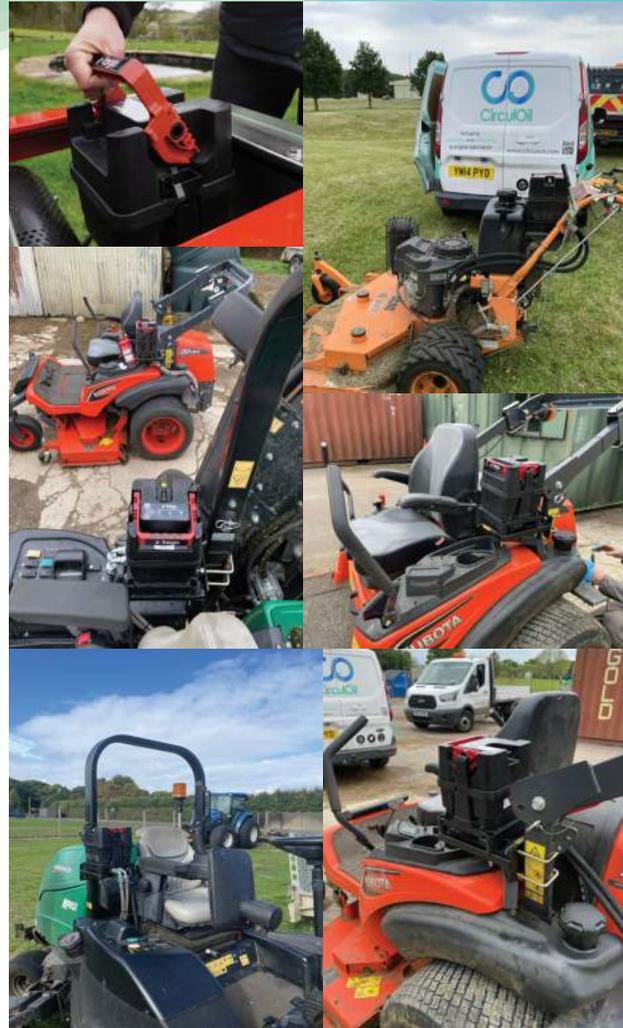

Annualised benefits. Based on a set of assumptions, speak to CirculOil team for more information about what it could look like for your fleet.

## A SERVICE PLAN BUILT FOR YOU

At CirculOil we are keen to ensure your equipment is maintained so we offer a **simple** and **affordable** subscription model, with instalments tailored depending on your equipment usage per year and oil change interval recommended by the engine manufacturer.

The annual price includes all costs associated with the oil service (oil supply, oil service & waste oil collection) with a one off payment for installation in year 1 and monthly **subscription from as little as £6 per month.**

If you would like to **get a quote** or talk to one of the team contact [info@circuloil.com](mailto:info@circuloil.com)

## REVOLUTIONARY OIL MANAGEMENT SYSTEM that brings CIRCULARITY & EFFICIENCY to engine lubrication

A quick, green and smart oil & filter change for your equipment.

CirculOil

**QUICK**

Our patented oil change system allows you to change your oil and filter in just **90 seconds!** With no mess or spills, the oil change can be done anywhere, by anyone which **reduces downtime** for the operators during the maintenance process.

Our oil change system can be retro-fitted onto most off-highway machines.

### Our Patented System

It is made up of a **removeable sealed oil cartridge** which contains the oil filter and tailored amount of oil as per the manufacturers recommendation. This connects to a fixed docking unit and oil is transferred to and from the engine sump using a keypad and pump control system.

**GREEN**

Every year over **1 billion litres of waste oil** is generated from the off highway sector and **less than 40% is re-refined** due to the way in which it's collected. The rest is either lost in the environment or burnt as fuel.

Our **unique collection** and **recycling solution** for waste oil, **helps reduce CO2** and plastic waste, reducing your impact on the environment.

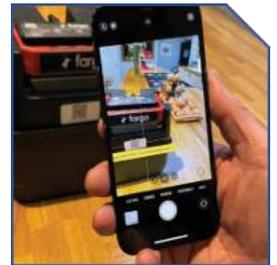

Our cartridges containing the waste oil are collected from the user by our dedicated logistics providers. The cartridges are cleaned, the oil is re-refined and both are put back into circulation for further use.

**SMART**

CirculOil's Digital platform will **track the vehicle usage**, to ensure that the manufacturers recommended service interval is not missed.

Our **track and trace** technology will then follow the lubricant and cartridge as it is collected, reprocessed, re-filled and distributed back to customers, ensuring an **efficient wasteless process**

The CirculOil Digital solution will also support our customers and partners with knowledge, data-driven insights, and tools to accelerate your circular journey.
