ABOUT

Cynthia L. Elliott is a four-time best-selling author, cultural futurist, and consciousness pioneer — one of the most urgent voices in the global conversation about AI and what it means to remain fully human. Named one of the Top 100 Women Leading AI by 100 Women of Davos and recognized as Unstoppable Woman of Web3 & AI by WOW3, she doesn't react to the AI conversation. She created it.

Raised in an orphanage and foster care, Cynthia transformed profound adversity into a lifelong mission. As the founder of Dreamweaver Brand Communications, she pioneered influencer marketing and brand communications, putting global brands like Escada, Silhouette Eyewear, and Swarovski on the map. Today she leads one of the most timely movements of our era at the intersection of consciousness, technology, and human transformation.

As founder and Director of the SoulTech Foundation (501c3), she builds the frameworks, communities, and educational programs humanity needs to thrive in the Age of AI. Her four best-selling books include *Unleash the Empress*, *Memory Mansion*, *A New American Dream*, and *SoulTech: 12 Codes for Awakening Your Higher Consciousness* (Gothic House Media, Oct 28, 2026). She hosts the SoulTech with Cynthia podcast. Her work has been featured in the NYT, Vogue, WSJ, & the Miami Herald.

SIGNATURE KEYNOTES

1. Human Flourishing — The Future of Humanity in the Age of AI

We are living through the greatest disruption in human history — and most people are navigating it without a map. Cynthia reframes the AI conversation entirely: this is not a technology crisis. It is a consciousness crisis. She charts a bold vision for how humanity can evolve emotionally, spiritually, and culturally to not just survive the Age of AI — but to flourish in it. Audiences leave with a new understanding of what it means to remain fully human when the machines are rising.

2. The Only Tech That Matters: SoulTech

Artificial intelligence can write your copy, code your software, and predict your behavior. But it cannot replicate your consciousness, your intuition, your creativity, or your sense of purpose. In this thought-provoking keynote, Cynthia introduces the concept of SoulTech — the inner technology that no algorithm

SIGNATURE KEYNOTES (CONT.)

4. Conscious Leadership for the Next Era

The leadership playbook that built the last century will not sustain the next one. The leaders who define the coming era are the most emotionally intelligent, the most empathetic, and the most conscious. Cynthia makes the case that consciousness is the new competitive edge — and explores why empathy, self-awareness, and spiritual grounding are the defining superpowers for lasting impact in a world being reshaped by AI.

5. Women, Wellness & the Future

Women are navigating a revolution — in technology, in medicine, in culture, and in their own bodies — often without adequate support, representation, or tools. Cynthia explores the evolving frontier of women's health, wellbeing, longevity, and empowerment in the AI era, painting a bold picture of what becomes possible when women are given the frameworks and inner technology to truly thrive — not just endure.
