

L83 J RANCH

ANNUAL BULL SALE

FEBRUARY 24, 2026

1PM • KIST LIVESTOCK • MANDAN, ND

Welcome to the Sale!

Welcome back for a very special edition of the L83 Annual Production Sale. Our 50th Annual Production Sale! A milestone that could not have been accomplished without many things. The determination of a cowboy who had a vision; the resilience to strive to make each day successful; the toughness to battle some of the most absurd weather events; a family that continues to maintain a progressive mindset; and the friends and customers that trust in us. To start the second half of a century of production sales, we have made the tough, but exciting decision to change the sale date. This year, and the years that proceed us, the L83 Ranch Annual Production sale will continue to be held on the Fourth Tuesday in February.

We are bringing you this set of bulls with confidence. We have assembled the most solid set of bulls that has ever hit the ground in Westhope. Some new genetics, the second year of Black Angus and Simmental, some low in quantity, but none low in quality folks. You don't have to worry about sifting and ranking through quality when you look at these bulls. The low usage of ET technology in our program brings you bulls that were raised by their genetic dam. Our cows need to earn their keep, and they do. We develop our bulls on a high roughage and low energy diet to ensure proper skeletal development and maintain quality foot structure.

Another year of BIG news in the families that comprise L83. The newlyweds, Ben and Lacey Lodoen, are having a baby!! They are ever excited to introduce the next Lodoen to this world in April. Wyatt has locked in his Bride-To-Be! Wyatt and Izzy will be getting married in the fall of 2026 and we cannot WAIT to add Izzy to this family!! Also adding to the family, was Molly and Chandler with the birth of their beautiful baby girl, Scout Rose Meiers. The Marthaler's continue to fire up the good vibes and laughs around the Ranch. The Westby's grace us with their bubbly, beautiful, and smart daughter Ajla with frequent visits to Westhope.

As the family continues to grow, so does our passion for this industry. We are extremely grateful for what has been put forth for us to print our 50th Production Sale catalog. Our team pushes forward to continue the dedication and devotion towards our customers, the Ag. Industry as a whole, and our families. Thank you all for taking the time to evaluate our offering, and like always, do not be hesitant to call or show up at the Ranch to look at the bulls.

-THE BRAND YOU CAN TRUST-

*I*NNOVATION — AgMarketing, LLC —

Generational family ranches are the pride of the industry. These family operations have endured many challenges over the years, and those managed well flourish, especially in times such as these. The L83 is recognized throughout North Dakota and the surrounding Canadian neighbors as a brand of loyalty, integrity, and stewardship. Stewardship of the tillable acres and the grassland that supports the passion within the barbed wire fences of the Lodoen Family operation. Ben and Lacey represent the youngest generation of the family operation and trust us when we say it's in very good hands.

The Newlyweds will continue the trails blazed before them with the great intention of improving and increasing the assets that make the operation successful in the right ways at the right time. These cattle that grace the pages of this sale book represent sweat and fiscal equity, dedication, and unwavering perseverance in breeding and developing a product that is not only suitable for profitable production for them but also for their loyal customer base. These Red Angus cattle are the kind with just a little more! A little more profit potential, a little more growth, a little more gain, a little more maternal instinct, with a whole lot more customer service. Ben's passion and dedication to continuing to produce Red Angus cattle that encompass the broad scope of the industry are relentless. The research, time, and acquisition investment are evident year over year in weights, measurements, and overall quality. We think many will share our opinion on the New Sale Date, February 24, the fourth Tuesday of February. The bulls will be suited up and ready for turnout. They are very robust in design, with plenty of shape, depth, density, and substance of skeleton. They will have the genetic tools and data to support efficient but substantial growth, with added carcass traits and sensible calving merit. Never in our lifetime have live calves been more valuable than they are today, and these Red Angus studs are prepared to deliver on all levels. Industry-wide, the influence of these red-hided cattle is recognized from coast to coast and border to border, as they are the true commercial man's kind. Ben has done a masterful job of mating and developing these bulls, and we know that you will recognize that they fit the mold for the prototype herd bull, whether seedstock or commercial.

If you have never attended an L83 Ranch Bull Sale, we strongly encourage you to do so. If you have been before, we invite you back for the food and hospitality from the great folks at Kist Livestock. Ben is available for any and all sale-related matters and is your best contact for more information about this offering of Red Angus herd sire prospects. However, if you need assistance with selection or sight-unseen purchasing, please reach out to any member of the Innovation Ag Marketing team as well. When people invest or do business with the great people in the industry, good things happen for all involved, and this is one of the GREAT places with GREAT people that will bring peace of mind about who you spend your money with.

Thank you for your interest. Please enjoy the cattle..

*Tim Anderson, Graham Blagg &
Jered Shipman*

SALE TERMS & CONDITIONS

Any bidding disputes will be settled by the auctioneer. Announcements made from the sale block on sale day take precedence over the catalog. EPDs were pulled 1/29/2026.

GUARANTEE

All bulls sold in this sale are guaranteed to pass a breeding soundness exam and health evaluation prior to delivery. In case the bull is declared a non-breeder, the bull will be replaced with one of similar quality if possible or the purchase price will be refunded. This breeding guarantee is valid through October 15 th of the first year. We encourage buyers to purchase mortality and loss-of-use insurance on sale day.

INSURANCE

As soon as an animal is purchased, it becomes the responsibility of the buyer. We do recommend buying insurance for any bull not taken home by the buyer sale day as we will not be responsible for sickness or injury after sale day.

Brett Schaefer - Heritage Insurance Services (701) 818-0806

SUPPLEMENT SHEET & SALE ORDER

On sale day, you will be provided with a sale order and supplement sheet with current performance data on all bulls.

CATTLE VIEWING

Bulls are available for viewing at the ranch at any time. Each visitor to the ranch will be entered into three drawings of \$500 to be used as a credit towards the purchase of a bull on sale day. The bulls will also be available for viewing at Kist Livestock once they arrive to the sale facility.

HERD HEALTH

Vet care is provided by Carin Frenchick, DVM - Minot Vet Clinic - Minot, ND

NUTRITIONIST

Lacey Lodoen- United Quality Coop - (701) 678-4484

SEMEN INTEREST

We will reserve the right for In-Herd Semen Use on all the bulls, unless otherwise stated.

BULK BUY BENEFITS

The price of each bull purchased by an individual must meet or exceed \$5,000 per bull.
- 3 Bulls - 3% Discount
- 4 Bulls - 4% Discount
- 5+ Bulls - 5% Discount

DELIVERY & FEEDING

Free Delivery on bulls in North Dakota and within 500 miles of Mandan. On bulls valued at \$10,000 or more, free delivery will be provided in the US and Canada. Other logistics will be coordinated between us and the buyer to accommodate all requirements. All bulls will return to L83 and fed until April 1 st free of charge.

VIDEOS AND ONLINE BIDDING

We will have videos of the bulls at DVAuction.com. Online bidding will be available through DVAuction. Please register early to ensure you are an approved bidder.

50 Years!

OUR HISTORY

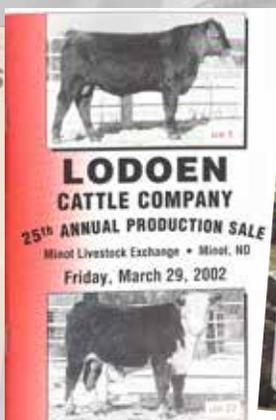

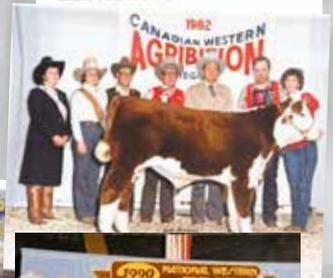

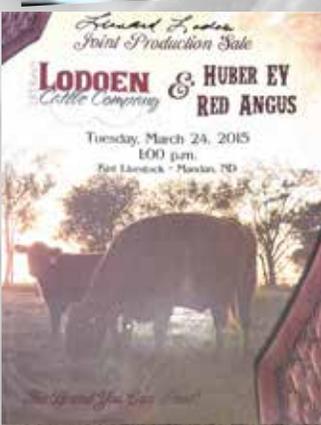

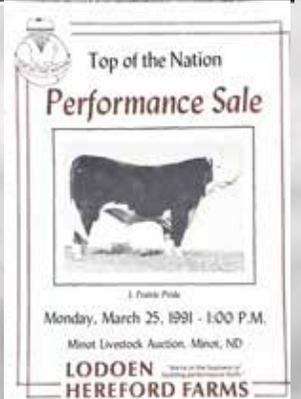

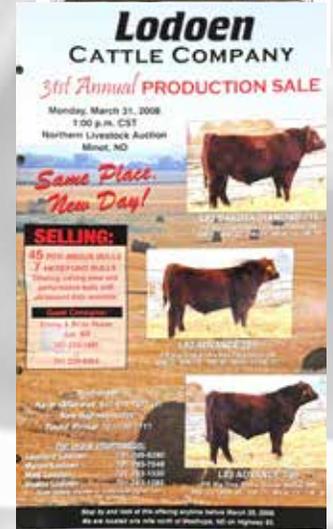

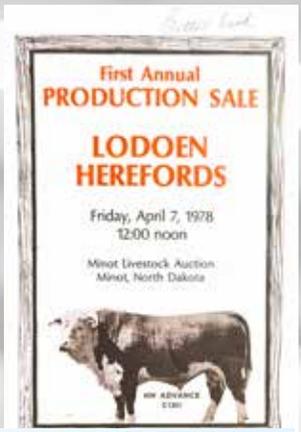

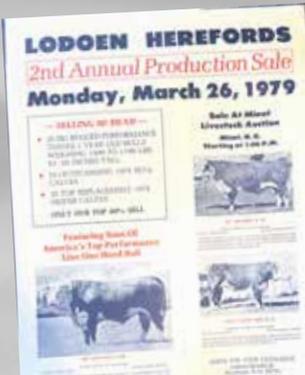

The very beginning of the L83 Ranch goes back to 1951 when a young cattle enthusiast found himself buying his very first 4H steer. Leonard Lodoen never would have expected what the future had in store for him and his family after this first venture. Leonard, along with brother Myron, began Lodoen Hereford Farms where they had been known across the USA and Canada. In 1994, Lodoen Hereford Farms began the transition into Lodoen Cattle Company when they purchased our first Red Angus cows from Charlie and Linda Lewis of Rock Creek Red Angus in Joliet, Montana. This crazy choice, made by a reputable horned Hereford breeder, was followed through by using his intelligence to learn the pedigrees, persistence to understand EPDs, and ambition to thrive in the Red Angus breed. During these next years, Lodoen Cattle Company has grown and expanded into what is now L83 Ranch.

OUR PROGRAM

L83 Ranch consists of Red Angus, Hereford, Black Angus and Simmental cows. We use these cows to build up our own herd, host a fall female sale in October, and raise bulls for the Annual Production Sale which is held on the FOURTH Tuesday of February at Kist Livestock in Mandan, ND. We strive to maintain a healthy, highly presentable, and docile cow herd. We have a fair amount of Canadian genetic influence in our herd, which has pleased us. The combination of the American and Canadian genetics was a choice we made in order to keep our gene pool diverse, and also, to take advantage of the traits that all of the genetics and pedigrees bring forth.

OUR GOAL

Within the growing families comprising L83 Ranch, we all maintain the same goal. That goal is to improve the agricultural industry as a whole. Our wholehearted effort is put into everything that we do. In order to improve an entire industry, it begins with the commercial cattle producers. While providing a supportive and positive lifestyle, we push to listen to our customers and make decisions to fit their needs.

- A real herd sire to lead off the offering! L83 Outlaw 19N is sired by the great son of PZCTMAS Firestorm 1800 ET, MCKY 8731 ET, or better known around here as "Josey Wales". The 'Josey Wales' influence has been strong and potent here for several year now, and his ability to inject real world shape is well known. He is backed by a maternal granddam, Tree Lane Ms Lighting 224, that is also no stranger to influencing quality production, being the mother of the iconic TLC Alaynah 329.
- Both females would appear on the bottom side of the pedigree of the recently slapped National Champion for Shaylee Hartman, HEH Shelley 1M ET.
- This stud did not skimp on weaning day boasting an incredible 846lbs. weaning weight ratioing 118. In terms of predicted data, he ranks in the top third of the breed for growth traits WW, YW, and ADG.
- A herd sire potential that will drive income into his next firm come weaning day!

- This dark red dude has herd sire written all over him! Sired by one of the great Six Mile John Wick 882E sons, Six Mile Mossy Oak 175H, 20N has added phenotype built into the recipe.
- You can bet he will add pounds to the next calf crop with predicted values in the top 10% for WW, YW, and ADG backed by an impressive 807lbs. weaning weight. If making money is your motive, we recommend investing here!

- This next lot comes from the cornerstone females for the Lodoen firm, L83 Tink 627D. 627D is responsible for in-house herd sire L83 Red Viper 50K and sale highlights year after year.
- She completed her task, yet again this year, with this high end GCC JBCC Harvest Moon 313K son. 11N has added length to his neck and body while maintaining adequate shape and substance.
- You will have quite the anticipation built up this time next year with the arrival of his first calf crop.

- The second of the sons of the Griswold owned GCC JBCC Harvest Moon 3113K is another long made, extended bull. "Harvest Moon" comes with doses of great males and females in his pedigree, such as Red U2 Moonbeam 194 and Silveiras Mission Nexus 1378.
- 5N's feeder cattle will be highlights wherever marketed when the time comes.

• Predictability in pedigree on full display here. This good-looking stud is sired by a Weber Land & Cattle produced son of kingpin, LSF SRR Takeover 5051C, better known as "Beartooth", and backed by the ever-relevant "Marta" cow family.

• You can't find a more proven and sought after script when it comes to producing red hided cattle that are right in their build and body with added look, and most importantly, they work effectively when put into production. We suggest tying in here for long term success!

LOT 16

- From his very modest 74lbs. actual birthweight, to his impressive 761lbs. weaning weight we think this guy will be the source of a very advantageous growth curve in his progeny!
- He is very balanced from both a phenotype and numeric standpoint, and we think he is a complete and logical option for a cattleman or woman that needs a herd bull that will sire both feeder cattle and replacements with added value, but is also one that has the build of longevity to be a long-term investment towards bettering the cowherd.
- There are big things in store for the dam of Lot 16, she is a maternal sister to the L83 Mentality 19M stud that sold in 2025 to Flint & Jana Hance that was a part of our NWSS Pen of Three bulls.

CALVING EASE OPTION

L83 MENTALITY 19M
MATERNAL BROTHER TO DAM

LOT 17

- L83 Beartooth 43N stands at the front of the class when it comes to sorting the offering for the dollar indexes! These indexes are built by combining certain pertaining traits, at differing weightings to build a scale for producers to recognize the value that these cattle offer in different situations, HerdBuilder focuses on maternal traits, Grid Master relates to carcass traits and ProS is an all-purpose index that is built around profitability and sustainability.

- He comes with top quarter of the breed BW figures, along with top 7% DMI, top 20% Milk and Stay, and top 12% Marbling. We think he offers lots of value to programs that are looking to produce the lower input, high output kind that need lower maintenance and upkeep to still provide the goods.

- We purchased his dam from RJ Cattle and the Bergh family of South Dakota because she was an outlier phenotypically and genomically. We think there is a bright future ahead for this female.

- Here is an exciting son of the trending, BYU Red Baron 1333 ET stud that just recently sired the Grand Champion Red Angus Female and 5th Overall Supreme Champion at the 2026 Cattleman's Congress. BYU Red Baron 1333 ET is the \$62,000-valued Red Angus stud that was raised in the Bayou Creek Ranch breeding program and has been locked down semen wise, except for a handful of packages that were sold the week after he was purchased by Nixon Family Farms of which we invested in. That was until a limited release was made at Embryos on Snow this past January when it commanded over \$600 a unit for the sexed semen.

- These BYU Red Baron 1333 ET cattle are powerhouses and come with an added degree of ruggedness and stoutness, they truly have all the extra shape and power that you could ever want.

- Maternally he stems back to the origins of the Red Angus program at L83 in the Lambrecht Pauline cow family that started everything you see here. Built upon the pillars of longevity, toughness and productivity, this cow family stands tall among the most powerful to work in Westhope.

• The Dreamy lineage that builds the maternal pedigree here is responsible for as many dollars and banners as just about any cow family in the modern-day Simmental breed, they truly have stood at the forefront of the business for approaching a decade now, so you can trust that there is evidence to validate investment. The maternal granddam and original Bailey's Ms Dreamy 946W has a lifetime of earnings well into the 7-figure range, and there looks to be no end in sight as she still rules to roost for Scott Bailey.

• This purebred son of the National Champion TJSC Coping With Destiny 9K is one impressive specimen that comes with a big set of running gear, extra heavy muscle pattern and bold shape!

• To add both look and power this guy fits the bill, along with supplying maternal power from some of the best in the breed.

- L83 Reserve 44N comes from a little different pedigree than Simmental buyers from the L83 are probably used to. He comes with a strong genomics profile that covers a lot of bases that directly affect the profitability of a stockmen's program.
- He is sired by the Lazy C Diamond sire, LCDR Reserve 210J who comes with breed leading growth and performance predictions that rank among the breeds most elite. Maternally he stems from a Raml purchase that is sired by the popular curve bender Mr SR Mic Drop G1534 and comes with plenty of function and utility value.
- He came to the weaning pen with considerable scale pressure, measuring 771lbs. and the same impressive pay weight can be expected of his progeny as his genetic profile ranks him top 4% in the breed for WW and top 10% for YW and MWW. Beyond this he scores high for several profit driven traits and his All Purpose Index ranks him in the top quarter of the breed!

• Schmitz Remedy 2217N is a three quarter blood Simmental that comes with an impressive repertoire of quality, that is only trumped by the power of his stacked pedigree! His dam, Nords Lucy 221K is a W/C Bankroll 811D sired female from the iconic PVF Lucy 1125 donor that was a leader in the historic program and an instigator of several of the most notable success stories to come out of Gridley, Illinois over the past decade. Note that a maternal sister to 221K was the Stagemeyer family's American Royal Supreme Female, NJAS Reserve Champion Female and NWSS Reserve Champion Female. In production she has proven to be a force with both sons and daughters of prestige.

• He is sired by SO Remedy 7F who has become a go to sire in the Simmental registry, and while several of his daughters have made their way to the backdrop, he has also proven to sire a quality that works in the real world as the cattle come with added stoutness, practical shape and feedability. We think these are traits that reign true with this pair of brothers.

• Adding 2217N to the repertoire would be loading the bases of maternal power from both the Simmental and Angus breeds, and we think this impressive stud adds stripes to the proud family name he represents.

RAML MISS 9028
DAM

- Here are a pair of full brothers from the combination of 4/B Dynamo and the impressive, RAML Lock & Load 5838C sired daughter RAML Miss 9028, and boy has the combination clicked to create the kind of results we had hoped for!
- They are sired by the \$120,000 4/B Dynamo sire that has become a popular herd bull from the HCC and M&E batteries. This SO Remedy 7F son has been gaining traction as his daughters have become very favored by onlookers in Tecumseh, Nebraska as they come with even more real-world quality and the females are turning into incredible cows!
- We purchased the RAML Miss 9028 donor from the South Dakota based program that has built a cowherd which is based around maternal function and cattle that are built to be high production and long lasting. She stems back to one of their cornerstones in the DS 3726 Freedom Lady 65 CW "G600" donor through the high production, female raising, RAML Freedom Lady 311.
- These homozygous polled and homozygous black studs offer up value not just individually but as a pair that offer up the opportunity to keep the band of brothers together to use in a multi-sire pasture to help generate added consistency and uniformity in a calf crop.

- Schmitz RAML 2052N comes with a maternal pedigree that is loaded with several super powers from each of the breeds in his genetic makeup.
- His maternal granddam, PVF Lucy 1125 has certainly reached legendary status in the Angus world, with multiple daughters that have been heavily decorated both in the show ring and the production realms. Perhaps the most famous maternal sister to the Profit sired dam of 2052N is the 2019 American Royal Supreme Champion Female, Nords Lucy 8022 that is also the dam of the popular AI sire, STAG Fortunate Son 233. She will go down as one of the most popular Angus champions of the past decade.
- He stems from the W/C Lock Down 206Z sire line, a lineage that has been well renowned for generating a build of longevity and high productivity.
- We think with the loaded pedigree of maternal excellence 2052N sports her will be the source of high quality females! ***CALVING EASE OPTION***

RICHBURG

RED ANGUS MARKETING PROGRAMS

How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at (940) 226-4762 and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.
