

UPPER GUNNISON RIVER VALLEY TRANSPORTATION PLAN GUNNISON COUNTY, COLORADO (COMPLETED)

Charlier Associates prepared an innovative multimodal transportation plan for this high mountain valley. Work included travel behavior surveys, structured interviews, community roundtables and the first-ever joint meetings of the elected bodies of Gunnison County, City of Gunnison, Town of Mt. Crested Butte and Town of Crested Butte. Existing conditions and forecast travel trends were described and evaluated. A wide range of plan alternatives were considered with an emphasis on transit system development. The Master Plan included transportation program policies and programs as well as land use policies. One of the key elements of the plan was a gondola or fixed guideway connection between Crested Butte and Mt. Crested Butte. CAI has recently been selected by the same client group to perform a study of the feasibility of this gondola connection.

Client: Gunnison County,
Colorado
