**GREEN & CLEAN 6 STEP PROGRAM:**

- \*STEP 1 Spring: Season Long Enhanced Efficiency Fertilizer with Pre-Emergent**  
-This application provides season long fertilization and helps prevent a variety of both grassy-type weeds & broadleaf weeds.
- \*STEP 2 Late Spring: Broadleaf Weed Control**  
-This application eliminates a wide range Of broadleaf weeds in your lawn.
- \*STEP 3 Mid-Season: Grassy-Type Weed & Broadleaf Weed Control**  
-This application eliminates grassy-type weeds & broadleaf weeds that may have emerged late spring.  
-Customers who have opted for grub control will also receive insecticide for grub prevention.
- \*STEP 4 Fall: Broadleaf Weed Control**  
-This application eliminates a wide range of broadleaf weeds in your lawn that may have emerged during the summer.
- \*STEP 5 Late Fall: Core Aeration**  
-Our aeration pulls small soil cores and deposits them on the lawn surface. This helps reduce compaction and allows healthy circulation of water, air and nutrients to the root system.
- \*STEP 6 Late Fall: Winterization Fertilizer**  
-This is our final fertilizer application of the season. Paired with core aeration, this step helps the turf plant better prepare for the stresses of dormancy.
