

# High Frequency CHIRP Transducer

**BT70H600 / ST70H600**

**130–210 kHz 600 Watts**

**Great bottom detail and fish  
target resolution in shallow  
water up to 213 m (700 ft)**

A low-profile thru hull CHIRP  
transducer, that matches vessels  
deadrise to specific angle.

This series of transducers is designed to  
**minimize drag** and to **perform  
at high speeds.**

Available in bronze\*  
and stainless steel.

**\*Warning:** do not install bronze housing into metal hulls.
