

Medium Frequency CHIRP Transducer

BT70MA600 / ST70MA600

80–130 kHz 600 Watts

Bottom detail in shallow and medium depths down to 274 m (900 ft)

A low-profile thru hull CHIRP transducer, that matches vessels deadrise to specific angle.

This series of transducers is designed to **minimize drag** and to **perform at high speeds**.

Available in bronze*
and stainless steel.

***Warning:** do not install bronze housing into metal hulls.
