# THE IVATT INFORMER

Recording progress with LMS 10000

August 2021 - Issue 2

Our members' paper magazine, ICON, will show greater detail about each topic. The next issue will be printed within a couple of weeks. If you are not a member, please do sign up via this web page: [www.lms10000.co.uk/membership](http://www.lms10000.co.uk/membership)

## Steam Heating Boiler News

On the 14th of May Trustees Hanson and Tony supervised delivery of the two former Deltic Spanner MK2 steam heat boilers for 10000. One will go in the loco and the other be refurbished later as a spare. We have teams ready to restore these steam heat generators, including two gentlemen who worked on these or similar items.

This is the boiler from 55019, which has a complete set of cladding. It is quite damaged though, and we have to have a set made for the other boiler, so it will be replaced in due course.

This is the boiler from 55009. It was our second choice boiler shell, and was purchased as a spare when we realised how many parts we had received from the DPS.

One of our young members, Kieron, cleaning, lubricating and removing nuts and studs from one of our steam heat boilers at the workshop today.

## Membership

The Society is a registered charity. Membership is usually by monthly donation. There is no set membership fee. Simply decide how much you can afford to pay each month; minimum £2 per month.

The benefits of membership increase the more you donate. Click here for details of the different levels of benefit available. Your membership benefits are commensurate with the total donations you have made. If you would rather donate once every 12 months in lieu of monthly payments please contact us so we understand this correctly.

There are a number of ways to make a donation: via the bank, a cheque or Paypal Giving Fund. Click here to access the website membership page.

# Bogies News

The "spiders" arrived with the steam heating boilers. They had been taken off the bogies over a year ago, to enable access. They are part of the weight distribution and suspension system and sit centrally on the top of the bogies. The lower three photos shows them in place three years ago.

## Other news.....

### **The Society's Annual General Meeting**
