

# FLAIR GUT

## GUT PROBIOTICS

- ENABLES GOOD DIGESTION IN ANIMAL.
- PREVENTS WHITE FECES DISEASE.
- INCREASE IN APPETITE.
- TREATMENT FOR EHP
- VIBRIO CONTROL.

**USE ONLY  
1GRAM  
PER KG FEED**

## 6.3 BILLION CFU/G CONCENTRATION

### BENEFITS

- Promotes gut growth, development and integrity and act antagonistically against invading pathogens. It confers excellent immune modulation.
- Supplies essential amino acids, vitamins and enzymes leading to healthy growth and increased body mass.
- Daily metabolic stability and gastro intestinal tract ambience facilitates speedy removal of litter from the bowel.
- Due to rapid removal of faecal matters from the gut, it increases appetite and prevents White Gut / White Feces Disease.
- Acts as first time defense mechanism by preventing insurgence of pathogens into their gut.
- Our products True Guard and Flair Gut act as an effective prophylactic treatment for EHP.

### COMPOSITION

Lactobacillus Sporogenes  
Lactobacillus Mesentericus  
Lactobacillus Acidophilus  
B.difidum  
Bifidobacterium sp.  
Saccharomyces Cerviceae  
Saccharomyces Bulourdii  
Enterococcus sp.  
Clostridium butyricum  
Streptococcus bovis  
Aspergillus oryzae

# JORD

## SOIL PROBIOTICS

The dead shrimps, uneaten feed, excreta and dead plankton are due to usage of sanitizes. It leads to elimination of beneficiary bacteria and eventually the soil becomes sterile and non – supportive for lives therefore replenishing beneficiary bacteria is very essential for the Aquaculture activities.

### **BENIFITS**

- REDUCES ORGANIC MATTER**
- DECOMPOSES BOTTOM SLUDGE**
- RESULTS INTO HEALTHIER ANIMALS.**
- MINIMIZES AMMONIA AND NITRATE**
- TOXIC SUBSTANCES ARE CLEARED IN THE POND.**
- REDUCES BOD & COD LEVELS AND IMPROVES DISSOLVED OXYGEN LEVELS.**

### **DOSAGE**

**APPLY 1Kg PER HECTARE**

**JORD is a beautiful blend of 9 different beneficial micro organisms in a proper proportion to maintain the optimal soil quality.**

**9703331188, 7032848646**

# ARGO

## WATER PROBIOTICS

ARGO is a Proprietary blend of highly concentrated nonpathogenetic naturally occurring microorganisms. It controls six different *Vibrio* species such as *Vibrio harveyi*, *Vibrio parahaemolyticus*, *Vibrio vulnificus*, *Vibrio alginolyticus*, *Vibrio anguillarum*, *Vibrio splendidus*.

### BENIFITS

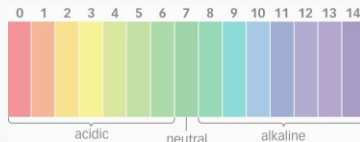

**MAINTAINS STABLE pH**

**IMPROVES SURVIVAL RATE**

**MAINTAINS STABLE BLOOM**

**INHIBITS HARMFUL BACTERIA**

**COMPETITIVE EXCLUSION OF PATHOGENS**

### DOSAGE

**APPLY 1Kg PER HECTARE**

### FEED MIXING

**Mix 2g ARGO With 100 ml water per Kg feed. Apply 2 days once for VIBRIO CONTROL IN GUT**

# TRUE GUARD<sup>+</sup>

- REDUCES AMMONIA
- REDUCES NITRATE
- REDUCES NITRITE

**20 BILLION LIVE BACTERIA PER GRAM**

## TOXIC GAS REMOVER

### BENEFITS :

- Strains are adaptable to different pH and salinity conditions.
- Removes organic load of pond bottom and reduces the pollution of the pond.
- Reduces ammonia, nitrate, nitrite and sulphur levels.
- Inhibits Vibrio, other pathogenic bacteria and reduces bacterial toxins in the pond.
- Ensures healthy environment for the Prawn, Fish, & Shrimp by reducing BOD & COD and - increasing DO levels.
- Our products True Guard and Flair Gut act as an effective prophylactic treatment for EHP.
- Reduces the frequency of water exchange.
- Reduces the mor

**DOSAGE:**  
**200g/ Acre**  
**WEEKLY ONCE**

**FOR TREATMENT:**  
**500g/ Acre**

### COMPOSITION :

Bacillus subtilis, Lactobacillus sps. Rhodococcus, Rhodobacter, Pseudomonas, Nitrospira, Nitrosomonas, Nitrosococcus, Nitrobacter and Saccharomyces cerevisiae.

# ALKADOWN

## ALKALINITY REDUCER

## BENEFITS :

- Optimizes Bicarbonate and Carbonate within the normal range.
- Reduces water hardness.

### Optimum Range:

Bicarbonate ( $\text{HCO}_3$ ) - 90 to 160 ppm

Carbonate ( $\text{CO}_3$ ) - 0 to 25 ppm

Total Alkalinity - 90 to 180 ppm

## MODE OF APPLICATION

Mix Alkadowan (2kg) with 200 L of dechlorinated water containing 4 Kg of Jaggery and 2 kg of any legume flour and brew for 2 to 4 days (Cold Weather) or 1 or 2 days (Hot Weather) and Broadcast uniformly over the pond surface for best results.

## COMPOSITION

Alkadowan consists of 7 different non-pathogenic microorganisms along with necessary enzymes. They include strains belonging to group and general Coryneform bacteria, Bacillus Sp, Pseudomonas Sp, Streptomyces etc, at a very high concentration of up to 2 Billion CFU.

## DOSAGE: 2 Kg/ Acre

# REMEDY FOR HARMFUL ALGAE BLOOM

**HABx works against the population dynamics of harmful algae blooms (HAB) and critically manages the blue green algae, filamentous algae and other HAB. The role played by Algicidal bacteria in promoting the decline of Harmful Algal Blooms is pivotal.**

## **COMPOSITION:**

**HABx is a beautiful blend of 5 beneficiary microbes including members of the alpha-Proteobacteria and Cytophaga groups in a proper proportion to maintain the optimal algal quantity.**

## **USAGE**

**Mix HABx with 100 L of dechlorinated water containing 2 Kg of Jaggery and 1 Kg of any legume flour and brew for 1 or 2 Days. Broadcast uniformly over the pond surface.**

**DOSAGE:**  
**500g to 1 Kg/ Acre**
