President's Message

Choose Wonder over Worry

When things happen in life, we have the tendency to worry. Next time something happens chose to wonder: Example: if you get bad news; wonder when the good news is going to happen. When you worry it can have a negative effect on the body, but when you wonder it can bring about positive energy / emotions. So, do not spend too much time worrying about something you can't control. Just wonder about the possibilities that could arise with a favorable outcome for worrying.
