Supporting Printed Circuit Boards

ITL Circuits is one of North America's leading providers of printed circuit board fabrication services for a broad range of electronic end products. We serve both original equipment manufacturers and electronic manufacturing service companies, with prototype and production-volume requirements around the world. ITL Circuits offers a range of manufacturing and materials options for your orders including quick turn prototype, mid-volume and large-volume production. ITL works with many different material types from such companies as Isola, Rogers, Nelco, Arlon and Taconics. ITL also offers a wide range of surface finishes, solder mask, electrical testing and full engineering and CAM services. From very small to very large, Summit can support your specific PCB requirements. We support over 100 different laminate options and multiple surface finishes. Summit is here to support your complex requirements from concept to manufacturing. We manufacturing most flex circuit designs including flex, multilayer flex, rigid-flex and flex assemblies with options of standard or oversized panels. With years of experience in manufacturing on low loss materials, we are skilled in meeting difficult registration requirements and can support advanced designs that include embedded resistors, cavities and unique edge plated feature

SUPPORTING PCBA'S AND MECHANICAL

Dutek has been specializing in high-mix/low-volume production of turnkey and consigned, surface mount and through-hole, printed circuit board PCB assemblies, DFM, Cable Assemblies, Box Build, and Functional Testing. Dutek consistently delivers top quality products by rigorously verifying specifications prior to production, strictly adhering to our TUV-certified ISO 9001 & 13485 Quality Management Systems (QMS), and only employing a very experienced and stable workforce. Our 20,000 square foot facility located in Vista, CA, is UL certified and ITAR registered

Now supporting Machining - FIP - Sheetmetal - Thermal materials....

3Gmetalworx is a specialized manufacturer of PCB-level RF/EMI shielding metalwork for electronic devices of all kinds. 3G provides board enclosure shielding in a wide range of material types and coatings, Fabric Over Foam, Wire Oriented Silicone, Knitted Wire Mesh, Conductive Foam and Elastomer Core. 3G also offers a large selection of silicone and polyether based wide and narrow band microwave absorbers. Since 1994, leading wireless electronics companies have relied on 3Gmetalworx to deliver cutting edge solutions for advanced RF/EMI PCB-level shielding requirements.
