# Dinosaur Family

This fierce Jurassic predator is a show stopping exhibit that will WOW your visitors. Meet *Allosaurus*, a supreme hunter and devoted parent.

This parent and child pair can add drama to another exhibition, or be leased individually, as a stand alone exhibit. The display includes a 30' long adult skeleton protectively wrapping around its child making the full display 20' long by 17' wide and 8.5' tall.

### Full Exhibit Includes

- Mounted skeletons of adult and juvenile *Allosaurus fragilis*
- Artwork by Mark Hallett and Brian Engh
- Interpretive panels

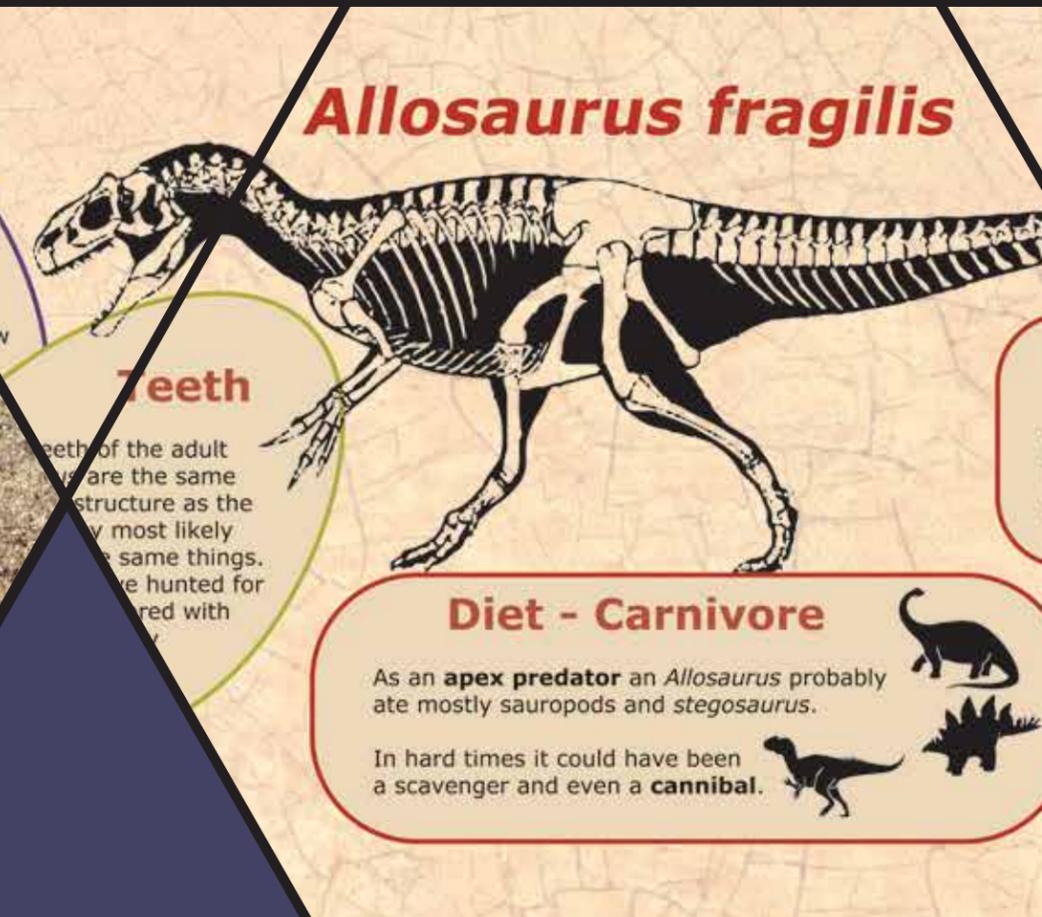

Artwork by Mark Hallett

- 2 pcs. 96"x48"x41"

## *Allosaurus fragilis*

### Teeth

Teeth of the adult are the same structure as the most likely same things. They were hunted for and served with...

### Diet - Carnivore

As an **apex predator** an *Allosaurus* probably ate mostly sauropods and stegosaurus.

In hard times it could have been a scavenger and even a **cannibal**.
