MAXPEDITION**AGR Grimloc Locking D-Ring.**

Pack of 4. Can be used on any 1" wide piece of webbing and replaces the metal carabiner for attachment of lanyards, weapons, and accessories. Fabricated from high strength lightweight plastic, incorporates GhillieTex IR-signature reduction technology, and resists solar heating. Its latch is designed with a detent to maintain an open position if needed and, while strong enough to carry equipment, it will break away with a soldier's weight, eliminating snagging hazards which can cause serious injuries. Release button is textured for ease of use with gloved hands and works as a pump for purging trapped sand or water through integral drain holes. Since the Grimloc is made from plastic, it will not serve as a platform for ricochets or become a secondary projectile. Used extensively by the United States Army and Marine Corps. Package of four. Ion thread (stronger than ordinary industry standard nylon thread). #AS-100 high grade closed-cell foam padding material for superior shock protection. High tensile strength nylon webbing.

#10 high strength zippers and zipper tracks.

UTX-Duraflex nylon buckles for low sound closures.

S-Biner.

Stainless steel construction.

Hold, secure and connect everything from house keys and cell phones to technical camping gear.

Dual chambers for added security.

Novel G design prevents accidental gate disengagement. Universal design holds nearly any key, accessory, or fob.

Not for climbing.

S-Biner SlideLock Single Pack.

Black finish stainless construction. Organize, connect, carry, and keep your valuables extra secure. Features two simple, innovative plastic sliders that, when slid into correct placement, keep the gates securely closed. Will stay firmly locked until you choose to unlock it, allowing for simple and secure linking, attaching, and carrying. Each gate can be independently locked for convenient access. Hang carded.
