

## Ideal air purifier to remove allergens and particulates in schools and municipalities

Various studies have illustrated that poor air quality in schools negatively affects a child's performance. Furthermore, the number of children with asthma and allergies in the US is on the rise. Now more than ever, air quality in the classroom is a major concern.

Our air purifiers are clinically proven to improve the health of children. Austin Air Purifiers effectively remove allergens, dust, mold spores, chemicals and gases. Guaranteeing the air is clean, safe and free from pollutants.

Clean air in the classroom gives students the chance to succeed and thrive at school. It allows them to be the best they can be.

## Core Competencies

### STANDARD SERIES AIR PURIFIERS

- **Medical Grade HEPA:** Captures particulates down to 0.3 microns. Ideal for students and faculty suffering from allergies or symptoms triggered by air-born particulates.
- **Activated Carbon Blend:** Most of our standard series units use up to 15 lbs. of carbon/zeolite blend for odor and chemical removal.
- **Clinical Trials:** Studies conducted by Johns Hopkins University and Cincinnati Children's Hospital prove that our air purifiers reduce asthma attacks in children and improve overall respiratory health.
- **Durable Design:** Powder-coated steel construction to last a lifetime.

## Past Performance

- **Calhoun County, Alabama (FEMA):** 28,000 Air Purifiers provided through FEMA to all county residents and schools.
- **West Coast Wildfires:** Provided to many residents and schools during wildfire seasons.
- **School Districts:** Provided to Porter Ranch CA Schools, Citizens of the World Charter School, Rapid City Area Schools, Purdue University, L.A. USD, Ashland Public Schools, University of Colorado, and many more.
