## PROFILE SUMMARY

Production Assistant and Runner with experience supporting music videos, fashion campaigns, short films and commercial productions across both set and production office environments. Confident delivering reliable day to day production support including logistics, call sheets, scheduling coordination, equipment management, runner duties and general crew assistance, contributing to organised workflows and efficient production days from prep through to wrap.

Experienced working across fast paced shoots ranging from independent productions to larger scale projects, including collaborations with established production teams in Los Angeles. Recognised for a proactive, solutions focused approach, strong organisation and clear communication, with the ability to anticipate production needs, adapt quickly to changing schedules and remain calm, focused and efficient throughout demanding filming periods and full production weeks.

Alongside building a strong foundation within production, I maintain a genuine interest in visual storytelling and the creative process, with a long term ambition to progress into Creative Direction. Committed to continuous development through practical industry experience and collaboration, I aim to contribute as a dependable, observant and hardworking member of any production team while supporting both the practical and creative demands of professional productions.
