## TXL - 10 AWG Automotive Crosslink Wire Specifications:

- **Use** - Automotive cross-link wire can be used in high temperature areas such as engine compartments, due to its light weight construction makes it perfect for race applications.
- **AWG** - 10 Gauge
- **SAE Type** - SAE-J1128 TXL
- **Insulation** - Cross-Linked Polyethylene (XLPE)
- **Conductor material** – Bare copper
- **Conductor stranding** – 19/23
- **No# of strands** – 19
- **Strand size** - 23
- **Nominal Insulation thickness** – 0.508mm
- **Number of conductors** – 1
- **Nominal Insulation thickness OD** – 3.937mm
- **Weight per linear meter** – 49.10g
- **Temperature range** - -51 to 125 deg C
- **Resistance** – To moisture, grease, oil, gasoline, most acids and solvents
- **Material** – Superior abrasion resistance
- **Surface** – Completely smooth
