PLASTIC EARTH

Solutions To The World's Plastic Crisis

Hosted By
Rob Riggle

Hosted By Rob Riggle

"I am one of those guys that's an optimist. I am always optimistic. I don't know how you can be any other way."
– Rob Riggle

PLASTIC EARTH

Many films cover the problems associated with single-use, petroleum-based plastics, but few propose solutions. This documentary educates the entire world on real, practical solutions.

The Plastic Problem

According to National Geographic, 73% of Beach Litter Worldwide is Plastic

The litter includes filters from cigarette butts, bottles, bottle caps, food wrappers, grocery bags, and polystyrene containers.

1 Million Plastic Bottles & 2 Million Plastic Bags Are Used Every Minute

Up to 5 trillion plastic bags are used worldwide every year. In total, half of all plastic produced is designed for single-use purposes - used just once and then thrown away.

Plastic Production Has Doubled Over The Past 50 Years

Around 380 million metric tons of plastic are being produced yearly. About 8.3 BILLION Metric Tons (9.1 BILLION US Tons) of plastic have been produced since plastic was introduced in the 1950s, according to earthday.org.

Technology Today

Recycling Is Only Part Of The Solution

Recycling has been touted as the answer to single-use plastics, yet only a small percentage is actually being recycled. Approximately 91% of plastic is not recycled.

Old News Is Actually "New" News

The latest research and discoveries prove that new PHA plastics coupled with existing technologies can indeed replace old PET (petroleum-based) plastics with bio-compostable, toxic-free properties.

It Is Possible To Live "Waste-Free" With Zero Waste

In some communities, using zero plastic does exist. We explore these methods of removing PET plastics and show viewers how some ingenuity and commitment can create a new way of living.

Plastic Solutions

With brilliant petroleum-based plastic alternatives uncovered by our investigative research team, major corporations, scientists and environmentalists passionately explain how to solve the plastic pollution crisis.

The Time Is Now

 Plastic Production Is Set To Expand 30% In The Next 5 Years

 The General Public Is More Aware Of The Problem And Seeing The Consequences

 Local, State, And Country Governments Are Banning The Use Of Many Plastics In Packaging

 Oil Companies Expect For Plastic Consumption To Grow

Roadmap to Success

At least 14 million tons of plastic end up in our oceans every year, and many countries lack the infrastructure to prevent the problem. This documentary explains the 10 ways our world society can combat plastic pollution in a comprehensive and collective way.

DreamPost Productions

ABOUT US

DreamPost Productions has been producing television and films for over 20 years. With hundreds of productions under our belt, we are extremely excited about being involved with this project, "Planet Earth".

BUILDING RELATIONSHIPS

We have been building our relationships with studios and networks for over 20 years. Our work has appeared on Netflix, Amazon, NBC, CBS, among others. Our work on the hit TV series, "Drug Wars", has been seen by millions around the world. We also have a network of A-list talent, which we are proud to have in our support system.

TRUE STORYTELLING

Our team is dedicated to producing projects that are compelling, interesting and pertinent. We are not interested in storytelling that exaggerates the facts. We make sure that viewers get the whole story and not just part of the story.

The Team

JACK WINCH

Executive Producer/Co-Director/Cinematographer

Jack has produced dozens of television shows and documentaries over his career. This particular production, "Plastic Earth", happens to be particularly interesting to him after watching several documentaries on the plastic crisis topic, yet not seeing one documentary (feature length) that focuses on the solutions.

JANICE OVERBECK

Executive Producer/Co-Director/Producer/Talent

Janice, the visionary of this film, is also owner of one of the most successful real estate companies in Georgia,. She takes on the "40-Day Plastic Free Challenge" in hopes of discovering if it's possible to live a zero-plastic waste life in today's world.

PLASTIC EARTH

Solutions To The World's Plastic Crisis

Hosted By
Rob Riggle

"We are being choked to death by the amount of plastic that we throw away. It's killing our oceans. It's entering into our bodies in the fish we eat."
- Kevin Bacon, *Actor*

"Plastic will be the main ingredient of all our grandchildren's recipes."
-Anthony T. Hincks,
Author

"[A] plastic pollution free world is not a choice but a commitment to life – a commitment to the next generation."
- Amit Ray, *Author*

PLASTIC EARTH

SYNOPSIS: "Plastic Earth" follows the story of a concerned mother's quest to find the solutions to the world's plastic problem after seeing a video of the ocean filled with plastic waste.

OVERVIEW

- Answers the top 10 ways to solve the global plastic crisis with the newest technologies.
- Features the world's leading innovators, researchers, scientists and material engineers sharing insights about recycling, composting, biopolymer production, and petroleum-based plastics reduction.
- Rave reviews including: "...I honestly believe this is one of the best knowledge/scientific based documentaries I've seen on the topic." -*Environmental, Social and Governance (ESG) Panel Speaker*
