Important Questions/comments:

1. Diagrams 9 and 10 sum up the situation. Diagram 9 is probably the strongest broadside ever presented in any land dispute. The other diagrams are effective visuals. Diagram 6 is exactly what it says – absolute proof. Swifts have nothing but trouble with the stakes they have either moved, removed, created, or ignored. There is nothing hard to understand.
2. The Preliminary Statement says that our responses are complete and are based on records in Plaintiff's possession. Not so! The 10 diagrams represent significant progress and additional information. All other diagrams can be tossed.
3. I need to get copies of all documents -- to be informed. They must be ordered from the court by the attorney.
4. Walter Bartlau contacted Lawrence Brow to meet at the site. No response. Is there a problem? I need a survey from Stake A to B. The boundary cuts through the bunkhouse – how close to the ten platform?
5. I need information from Swifts: a full copy of the 1947 Swift map. I only have half. Emerson Swift's notebook would confirm much more.
