

# Castle Guard Estate & Ranch Early Warning System

***Protecting Ranch Properties has  
Never Been More Important***

## Castle Guard:

Offers a wireless sensor solution for ranchers and estate owners living in remote areas.

The Copperhead seismic footstep sensor detects subjects approaching the homestead before they become a threat to the homeowner.

- A wireless alert is sent to the gateway and displayed on the interactive Castle Guard mapping system.
- The homeowner is alerted via email whenever a sensor is activated.
- Emails may also be sent to Law Enforcement if desired.
